

Japan Credit Rating Agency, Ltd. (JCR) announces the following credit rating.

## **COSMO ENERGY HOLDINGS COMPANY, LIMITED (security code: 5021)**

<Assignment>

Shelf Registration: Preliminary A-

### *Rationale*

COSMO ENERGY HOLDINGS COMPANY, LIMITED (the "Company") is the holding company of COSMO ENERGY Group (the "Group"). Give the strong unity of the business management, JCR reflects the Group's entire creditworthiness in the ratings on the Company. For the fiscal year ending March 2024 (FY2023), ordinary profit (excluding inventory effects) is expected to decrease 12.5% from the previous fiscal year to 125 billion yen, expecting a decrease of two consecutive fiscal years. In relation to decline in crude oil prices, profits of the oil exploration and production business are expected to decrease. On the other hand, margin of domestic petroleum products (excluding time-lag effects) is stable and it will likely support the performance in the future as well. As for financial front, financial position will unlikely improve further due to a large amount of returns to shareholders, an increase in capital investments, and investments/loans; however, current level of soundness is expected to be maintained.

Hiroyuki Chikusa, Masayoshi Mizukawa

**3** The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7

- The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and business environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees.
- The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.

**A) Business Bases**

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

**B) Financial Grounds and Asset Quality**

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

**C) Liquidity Positions**

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

E) Order of Seniority in Debt Payment

The likelihood of debt payment can be different between given debts of the same issuer. The likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment which is determined by design as financial product or by laws, etc.

4 The Potential Limitations of the Credit Rating as Required by Paragraph (a)(1)(ii)(D) of Rule 17g-7
