

Japan Credit Rating Agency, Ltd. (JCR) announces the following credit rating.

Ecology Trust Bond 1st Series Fund Trust Bonds and Trust ABL

<Affirmation>

Bonds:	A-
ABL:	A-

Rationale

This is the project finance where cash flows generated from a number of solar power generation facilities (eight power plants in total) are underlying assets. On the back of a favorable amount of solar radiation, the power output has been basically at a good level as compared with the initial plan. The performance ratio should be observed over the medium to long term, but it is, along with the DSCR, currently at the level close to JCR's assumption. Although there are bad effects from responses to defects, power output curtailment, snow, etc. at some facilities, JCR for now does not observe any events that require JCR to change its forecast on the project earnings, stress evaluations, and so forth. Given these factors, JCR has affirmed the ratings on the trust bonds and trust ABL at A-.
