

Japan Credit Rating Agency, Ltd. (JCR) announces the following credit rating.

Jimoto Holdings, Inc. (security code: 7161)

<Affirmation>

Long-term Issuer Rating: BBB-
Outlook: Stable

Kirayaka Bank, Ltd. (security code: -)

<Affirmation>

Long-term Issuer Rating: BBB-
Outlook: Stable

THE SENDAI BANK LTD. (security code: -)

<Affirmation>

Long-term Issuer Rating: BBB-
Outlook: Stable

Rationale

- (1) The Jimoto Group is a regional financial group having Kirayaka Bank, Ltd. ("Kirayaka Bank") in Yamagata Prefecture, THE SENDAI BANK LTD. ("SENDAI BANK") in Miyagi Prefecture and others. Its fund volume of 2.3 trillion yen is midsize for a regional financial group and a bank in the Tohoku region. Jimoto Holdings, Inc. ("Jimoto HD") is an equity-method affiliate of SBI Regional Bank Holdings, Co., Ltd. and is strengthening collaboration with the SBI Group in such areas as sales promotion and business administration. Kirayaka Bank and SENDAI BANK are scheduled to shift to the next-generation banking system provided by the SBI Group by the end of the fiscal year ending March 2029 (FY2028), but, given that the degree of the SBI Group's control over and involvement in the Jimoto Group and Jimoto Group's managerial importance to the SBI Group appears to be low, the rating on individual Jimoto Group companies reflects the Jimoto Group's creditworthiness.
- (2) For the Jimoto Group, the pace of decline in deposits is slowing down at the two subsidiary banks thanks in part to the completion of branch consolidation and the positive impact of various promotional campaigns, and loans are trending upward as the banks successfully absorb strong local funding needs. While enjoying a certain business base in the Tohoku region, the Jimoto Group faces the challenges of increasing the basic earnings capacity, improving the quality of loan assets, eliminating valuation losses on securities, enhancing capital adequacy and so forth. Hence, JCR deems its creditworthiness to be equivalent to the rating of BBB-. JCR is keeping an eye on the measures taken to resolve challenges and their outcomes.
- (3) Earnings capacity is somewhat low for a regional bank in JCR's BBB rating category. Core net business income of the two banks combined (excluding gains/losses on cancellation of investment trusts) turned upward in the fiscal year ended March 2026 (FY2025) as growth in net interest income offset a drop in net fees and commissions and an increase in expenses. That said, ROA based on this income is low in the lower 0.2% range, and OHR based on core gross business income is high at around 80%. Because of controlled risk-taking in the market division and the impact of high cost ratio, average interest rate spread is narrow. JCR will watch whether the Group can increase earnings capacity by, for instance, improving the profitability of Investment and financing operations and increasing management efficiency.
- (4) Loan asset quality pales compared to others. Non-performing loans ratio under the Financial Reconstruction Act of the two banks combined as of the end of the first quarter of FY2026 remained relatively high at 4.6%. The amount of disclosed loans that are not covered by collateral, etc. is large relative to core net business income, leaving profits vulnerable to credit costs. Even though credit costs have been stable since FY2024, external factors including inflation and rising interest rates, in addition to the business conditions of large borrowers, warrant close attention to future developments.

- (5) Risks in the market division are small, and cautious risk-taking is continued. Investment funds constitute the bulk of the securities portfolio for both of the two banks, and their primary investments are in short-term bonds. The volume of bond holdings outside investment funds is modest, and their duration is short as well. At the same time, the two banks carry substantial unrealized losses, and JCR predicts that it will take a considerable amount of time for those losses to be eliminated.
- (6) Capital adequacy is somewhat low. Consolidated core capital ratio has been hovering at around 8%, which is a comfortable level compared to the required standard for the banks operating in Japan. As regards multiple public funds included in core capital, JCR recognizes equity content to a certain extent in consideration of the fact that the number of years to the conversion date, which is a benchmark of substantive repayment due date, is large. However, even with the equity content of public funds taken into account, the adjusted capital level is still low among regional banks in JCR's BBB rating category. Although there is sufficient time before the repayment of the public funds, the amount outstanding is substantial. Accordingly, JCR will closely monitor the pace of accumulation of retained earnings, which will constitute the primary source of repayment, as well as future capital policy and other developments.

Issuer: Jimoto Holdings, Inc.

Jimoto HD is the financial holding company of the Jimoto Group. Its long-term issuer rating is deemed to be at the same level as the Jimoto Group's creditworthiness. Double leverage ratio remains below a certain level, and, given the financial management policy and other factors, JCR assumes that the stability of cash flow balance will be maintained into the future. Therefore, JCR does not reflect the structural subordination of the holding company in the rating.

Issuer: Kirayaka Bank, Ltd.

- (1) Kirayaka Bank is a regional bank II headquartered in Yamagata City, Yamagata Prefecture with a fund volume of 1.1 trillion yen. It ranks third among three local banks, holding a market share of 12% for deposits (excluding JAPAN POST BANK) and 15% for loans, and ranks second in terms of SME lending, being the main lender to a relatively large number of borrowers. It also has a certain business base in the Sendai area as well. Given its core position in the Jimoto Group, as well as other factors including its standalone creditworthiness and business size, JCR deems the long-term issuer rating to be at the same level as the Jimoto Group's creditworthiness. While trends in credit costs require attention, JCR assumes that public support will underpin the rating, albeit capital adequacy leaving much room for improvement.
- (2) Earnings capacity is commensurate with JCR's BBB rating category. Core net business income (excluding gains/losses on cancellation of investment trusts) has been on an uptrend since FY2024, bringing ROA to the mid-0.2% range and OHR to just below 80%, which are average levels of regional banks in JCR's BBB rating category. Looking ahead, expenses may increase temporarily due to the upgrading of the accounting system, but JCR assumes that the basic earnings capacity will be maintained with increases in loan-deposit income and interest/dividend on securities and so forth.
- (3) Loan asset quality pales. Non-performing loans ratio under the Financial Reconstruction Act remained high at 5.9% as of the end of the first quarter of FY2026, as opposed to 5.7% a year before. Kirayaka Bank tightened self-assessment in FY2023 when it accepted public funds under COVID-related special measures and has since been working to support the rehabilitation of borrowers; even so, a considerable level of new non-performing loans are believed to have been emerging. Credit costs have been stable since FY2024, but, given such factors as the business conditions of large borrowers, future developments need to be closely monitored.

Issuer: THE SENDAI BANK LTD.

- (1) SENDAI BANK is a regional bank II headquartered in Sendai City, Miyagi Prefecture with a fund volume of 1.2 trillion yen. Its market share is small—7% for deposits (excluding JAPAN POST BANK) and 10% for loans in the prefecture—but remains stable. SENDAI BANK steadily secures a certain level of profits by appropriately controlling risks associated with investments and loans. Given its core position in the Jimoto Group, as well as other factors including its standalone creditworthiness and business size, JCR deems the long-term issuer rating to be at the same level as the Jimoto Group's creditworthiness.
- (2) Earnings capacity is somewhat low for a regional bank in JCR's BBB rating category. Even though core business net income (excluding gains/losses on cancellation of investment trusts) turned upward in FY2025, ROA based on this income is low in the upper 0.1% range, and OHR high at around 85%.

Looking ahead, expenses may increase temporarily due to the upgrading of the accounting system, but JCR assumes that the basic earnings capacity will be maintained as the expansion of interest rate spread between deposits and loans, growth in loans and other factors will push up loan-deposit income.

- (3) Loan asset quality is favorable, by and large. Non-performing loans ratio under the Financial Reconstruction Act remains somewhat high, standing at 3.4% as of the end of FY2025, but coverage ratio exceeds 90%. As regards loans to the real estate industry, which account for a large part of business loans, while attention should be paid to the impact of rising interest rates, etc., credit costs are not likely to become significant under the current circumstances as assets remain sound.

JCR is registered as a "Nationally Recognized Statistical Rating Organization" with the U.S. Securities and Exchange Commission with respect to the following four classes. (1) Financial institutions, brokers and dealers, (2) Insurance Companies, (3) Corporate Issuers, (4) Issuers of government securities, municipal securities and foreign government securities.

JCR publishes its press releases regarding the rating actions both in Japanese and in English on the same day. In case that it takes time to translate rating rationale, JCR may publicize the summary version, which will be replaced by the full translated version within three business days. (Regarding Structured Finance products, JCR only publicize the summary version in English.)

INFORMATION DISCLOSURE FORM

Japan Credit Rating Agency, Ltd.

Disclosure Required by Paragraph (a)(1)(ii) of Rule 17g-7

Issuer:	Jimoto Holdings, Inc.
Issuer:	Kirayaka Bank, Ltd.
Issuer:	The Sendai Bank, Ltd.
Rating Publication Date:	September 10, 2026

1

The Symbol, Number, or Score in the Rating Scale used to Denote Credit Rating Categories and Notches and, the Identity of the Obligor or the Identity and a Description of the Security or Money Market Instrument as Required by Paragraph (a)(1)(ii)(A) of Rule 17g-7

- Please see the news release. If the credit rating is a private rating, please see the report for private rating.

2

The version of the procedure or methodology used to determine the credit rating; as Required by Paragraph (a)(1)(ii)(B) of Rule 17g-7

- Please see the news release. If the credit rating is a private rating, please see the report for private rating.

3

The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7

- The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and business environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees.
- The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.

A) Business Bases

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

B) Financial Grounds and Asset Quality

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

C) Liquidity Positions

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The likelihood of debt payment is affected one way or the other by the issuer's related parties such as parent company, subsidiary, guarantor, and the government of the issuer's business domicile, etc. - by their own conditions and/ or position of support/ assistance for the issuer.

E) Order of Seniority in Debt Payment

The likelihood of debt payment can be different between given debts of the same issuer. The likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment which is determined by design as financial product or by laws, etc.

4 The Potential Limitations of the Credit Rating as Required by Paragraph (a)(1)(ii)(D) of Rule 17g-7

- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- The objective of the credit rating herewith presented does not include any concerns other than the likelihood of debt payment, such as risks of price changes, market liquidity, etc.
- The credit rating herewith presented is necessary to be reviewed along with possible changes of the issuer of rated objects in its business performance and/ or circumstances which include regulatory environment, and hence subject to possible alteration.

5 Information on the Uncertainty of the Credit Rating as Required by Paragraph (a)(1)(ii)(E) of Rule 17g-7

- The information used for the determination of credit rating as herewith presented is obtained by JCR from the issuer of rated objects and other sources that JCR trusts in terms of accuracy and reliability but possibly contains errors due to human, non-human or other causes. Consequently, the credit rating determined on the grounds of such information does not constitute, explicitly or implicitly, any representation or warrant of JCR on the information itself or any consequences of its use in terms of accuracy, relevance, timeliness, wholeness, market value, or usefulness for any specific purposes.

6 Use of Due Diligence Services of a Third Party in Taking the Rating Action as Required by Paragraph (a)(1)(ii)(F) of Rule 17g-7

- There is no use of any third-party due diligence service in the determination of the credit rating herewith presented.

7 Use of Servicer or Remittance Reports to Conduct Surveillance of the Credit Rating Required by Paragraph (a)(1)(ii)(G) of Rule 17g-7

- There is no use of any servicer or remittance report to conduct surveillance of the credit rating herewith presented.

8 The Types of Data Relied Upon for the Purpose of Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(H) of Rule 17g-7

- The information posted in the below, which includes data, is used for the determination of the credit rating herewith presented.
- A) Audited financial statements presented by the rating stakeholders
- B) Explanations of business performance, management plans, etc. presented by the rating stakeholders

9 Overall assessment of the Quality of Information Available and Considered in Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(I) of Rule 17g-7

- JCR holds its basic policies for securing the quality of information as a base of due diligence for the determination of credit ratings. The information used as a base for the determination of credit rating herewith presented satisfies such policies, which include the audit by an independent auditor, the warranty made by the issuer, the publication by the issuer, some independent media or, otherwise, JCR analyst's scrutiny, etc.
- JCR sees no particular weakness in the quality of information used for the determination of the credit rating herewith presented as compared to the information used in other cases of the credit rating for comparable issuers or ratable objects.
- If the credit rating is an Indication, please see the report for Indication.

10 Information Relating to Conflicts of Interest as Required by Paragraph (a)(1)(ii)(J) of Rule 17g-7

- JCR receives payment of compensation for the determination of the credit rating herewith presented from either one of those parties who are issuer, underwriter, depositor or sponsor.
- JCR did not receive in the last fiscal year in the past payment of compensation from the same party for any kind of JCR's service other than the determination of public or private credit rating, such as one in the ancillary business.

11 Explanation or Measure of the Potential Volatility of the Credit Rating as Required by Paragraph (a)(1)(ii)(K) of Rule 17g-7

A) Business Bases

The credit rating is subject to alteration if there is improvement or deterioration of the issuer's business bases, since its revenue, etc. may improve or deteriorate by the change in its business management policies, clients' preferences, competitive situation, or a technological innovation. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the business bases is large.

B) Financial Grounds and Asset Quality

The credit rating is subject to alteration if the issuer increases/ decreases its debt/ capital or vice versa and thereby makes its individual debt payment liability less or more bearable and its loss absorption capacity into the future decreased or increased. Also, the changes in the quality of asset under the issuer's holding may affect the credit rating, since such changes could raise or lower the likelihood of future loss of the issuer's financial grounds. The resultant alteration of the credit rating is usually by a

notch, with possibility of a few notches if and when the change in the financial grounds and/ or asset quality is large.

C) Liquidity Positions

The credit rating is subject to alteration if there is a change in the issuer's financial management policy or in the relations with fund procurement sources and the change thereby makes its liquidity positions improve or deteriorate. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is large.

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The credit rating is subject to alteration if there is a change in the issuer's parent company or subsidiary, guarantor or other provider of credit enhancement, or the government of the issuer's business domicile, or other related parties' own conditions and/ or position of support/ assistance for the issuer, and the change thereby makes its business bases, financial grounds and/ or liquidity positions improve or deteriorate, and/ or making the effectiveness of guarantee and other credit enhancement improve or deteriorate. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large.

E) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

The credit rating is subject to alteration if there is a change in the rated debt's status in the order of seniority relative to other debts caused by the improvement/ deterioration of the issuer's financial condition. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large. Also, in case of the financial products for which non-payment of interest/ principal is contractually permissible, the credit rating is subject to alteration if and when the likelihood of such non-payment is projected to increase or decrease. The resultant alteration of the credit rating could be by a notch but often as much as a few notches.

F) Rise and Fall in General Economy and Markets

The credit rating is subject to alteration if there is a rise/ fall in the general economy and/ or the markets inducing the issuer's revenues/ expenses to increase/ decrease and vice versa, etc. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is exceptionally large.

G) Various Events

The credit rating is subject to alteration on occurrence of various events, such as change in the issuer's major shareholders, M&A and other organizational change, accident, violation of the law, litigation, legal/ regulatory change, natural disaster, etc., which are unforeseeable at the time when the credit rating is determined, causing a significant change on the issuer's business bases, financial grounds, etc. The resultant alteration of the credit rating could be by a notch but more often than not as much as a few notches.

12

Information on the Content of the Credit Rating, Including the Historical Performance of the Credit Rating and the Expected Probability of Default and the Expected Loss in the Event of Default as Required by Paragraph (a)(1)(ii)(L) of Rule 17g-7

- Historical records of the credit rating herewith presented are posted in the end of this paper.
- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- Facts of the probability of default are posted as Form NRSRO Exhibit 1 on the JCR website under the URL:

<https://www.jcr.co.jp/en/service/company/regu/nrsro/>

13

Information on the Sensitivity of the Credit Rating to Assumptions Made as Required by Paragraph (a)(1)(ii)(M) of Rule 17g-7

A) Business Bases

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's business bases and powers of

earning or cash flow generation, etc. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's business bases on some drastic change in the operational environments, etc.

B) Financial Grounds and Asset Quality

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's financial grounds and asset quality. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's financial grounds and/ or asset quality on some drastic change in its business bases.

C) Liquidity Risks

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's liquidity positions. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's liquidity positions on some drastic change in its financial management policy or relations with fund procurement sources, etc.

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's parent company or subsidiaries, guarantor or other providers of credit enhancement, the government of the issuer's business domicile or other related parties' status and stance of support/ assistance for the issuer. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if there is a major change on the part of related parties, such as replacement, disappearance, some drastic improvement/ deterioration of financial grounds/ balances, etc.

E) Rise and Fall in General Economy and Markets

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the prospects of general economy and markets. JCR expects the change should be most likely by a notch but could be as much as a few notches, should the economy or the markets change so greatly.

14

Information on the Representations, Warranties, and Enforcement Mechanisms of an Asset-backed Security as Required by Paragraph (a)(1)(ii)(N) of rule 17g-7

- The credit rating herewith presented is not for an ABS product, and hence no relevant issue.

THE SENDAI BANK LTD.	Issuer(Long-term)	December 24, 2025	BBB-	Stable

Attestation Required by Paragraph (a)(1)(iii) of Rule 17g-7

I, Tomohiro Miyao, have responsibility to this Rating Action and to the best of my knowledge:

- A) No part of the credit rating was influenced by any other business activities.
- B) The credit rating was based solely upon the merits of the obligor, security, or money market instrument being rated.
- C) The credit rating was an independent evaluation of the credit risk of the obligor, security, or money market instrument.

宮尾 知浩

Tomohiro Miyao
