

Japan Credit Rating Agency, Ltd. (JCR) announces the following credit rating.

ENEOS Holdings, Inc. (security code: 5020)

<Assignment>

Bonds (Dated subordinated bonds): A

Rationale

<Issuer's Profile>

ENEOS Holdings, Inc. (the "Company") is the holding company of ENEOS Group (the "Group"). Given the fact that the Company handles functions for the Group, such as management policy formulation, management resource allocation and business management, as well as the Group's strong unity, the rating on the Company incorporates the entire Group's creditworthiness. In the core oil refining sales business, the Group has a 50% share of the fuel oil sales market. Although fluctuations in performance due to the impacts from resource prices and the product market are inevitable, margins of domestic petrochemical products have been ensured, underpinning the company's earnings. The Company also plans to maintain the soundness in the financial foundation, as shown by the scheduled fund-raise through subordinated bonds.

<Rationale for Rating on Securities >

JCR has assigned an A rating to the Subordinated Bonds, 2 notches below the long-term issuer rating on the Company.

In rating hybrid securities including subordinated bonds, JCR looks at the following points: (i) probability of deferral of interest or dividend payments in accordance with the deferral clause is usually higher than the probability of the Company's falling into default (probability of deferral); and (ii) ranking of claims at the time of bankruptcy is subordinated to that of ordinary debts, and as a result, probability of recovery is low (subordination property).

Ranking of claims to the Subordinated Bonds at the time of the Company's bankruptcy ranks *pari passu* with preferred stocks and is subordinated to all debts (excluding the Subordinated Bonds and the subordinated debts ranking *pari passu* with the Subordinated Bonds). Furthermore, an optional interest suspension clause is stipulated for the interest payments. JCR views that the probability of the actual suspension of the interest payments is low at the moment, taking into account, among others, the Company's financial conditions. JCR decided the notching from the long-term issuer rating in light of such subordination property and the deferral clause.

<Assessment of Equity Content of Securities and Rationale>

JCR determined the equity content of the Subordinated Bonds at "middle" or "50%."

JCR takes into account that "there is no obligation to redeem principal or no maturity," "there is no obligation to pay dividends" and "ranking of claims at the time of bankruptcy is subordinated" when assessing the equity content of hybrid securities.

While the periods to maturity are extremely long 60 years for any of the 1st, 2nd and 3rd Series Subordinated Bonds, and early redemption is possible after a lapse of 5, 10 and 15 years from the bond issuance for each of them, respectively. In addition, early redemption as a result of occurrence of Tax Events or Rating Events owing to changes in assessment of equity content is also possible. The interest rates are scheduled to be stepped up as follows: for the 1st Series Subordinated Bonds, 25 and 75 bps (100 bps in total) after a lapse of 10 and 25 years, respectively; for the 2nd Series Subordinated Bonds, 25 and 75 bps (100 bps in total) after a lapse of 10 and 30 years, respectively; and for the 3rd Series Subordinated Bonds, 25 and 75 bps (100 bps in total) after a lapse of 15 and 35 years, respectively. While the Company has expressed its intention to issue replacement securities at the time of early redemption, the effectiveness of the replacement language is not sufficient, based on financial requirements for exemptions to the replacement that allow the Company to forego the replacement. Meanwhile, the first interest step-ups remain at only 25 bps, and it is considered that the Company's discretion for the early redemption will be substantially and significantly constrained when the step-ups reach 100 bps in total. JCR took into account this point in the assessment of the

permanence of the principal. Based on the factors above, JCR considered it is unlikely that the Company will make an early redemption without replacement when its creditworthiness declines and thus factored this view into the evaluation of the effective redemption obligation and maturity for the Subordinated Bonds. This judgment reflects, along with other factors, that: (i) JCR, based on hearing from the Company, was able to ascertain the Company's future financial management policy including the position of the Subordinated Bonds; and (ii) the Company has long been winning confidence of investors and creditors by maintaining good relations with them in the financial market.

As for the interest, the fact that there is no clause for mandatory interest suspension weakens the similarity of the Subordinated Bonds to common stock. However, the optional interest suspension clause provides a mechanism whereby the interest payments can be suspended in a stressful situation. JCR takes into consideration this mechanism for maturity and interest suspension, as well as other factors including the ranking of claims to the Subordinated Bonds at the time of bankruptcy being subordinated to the senior obligations of the Company.

JCR will consider lowering assessment of the equity content to "low" or "25%" at the time when the remaining period of each of the Subordinated Bonds becomes less than 20 years before interest is stepped up 100 bps in total.

Hiroyuki Chikusa, Masayoshi Mizukawa for Issuer
Kiichi Sugiura, Takahiko Yamaguchi for Hybrid Securities

Rating

Issuer: ENEOS Holdings, Inc.

<Assignment>

Issue	Amount (bn)	Issue Date	Due Date	Interest	Rating
1st Series Deferrable Interest and Callable Unsecured Subordinated Bonds	JPY100	June 15, 2021	June 15, 2081	(Note 1)	A
2nd Series Deferrable Interest and Callable Unsecured Subordinated Bonds	JPY100	June 15, 2021	June 15, 2081	(Note 2)	A
3rd Series Deferrable Interest and Callable Unsecured Subordinated Bonds	JPY100	June 15, 2021	June 15, 2081	(Note 3)	A

Notes:

- 0.70% per annum from next day of Issue Date through June 15, 2026
6M Euro Yen LIBOR + 0.70% for interest payment dates from next day of June 15, 2026 through June 15, 2031
6M Euro Yen LIBOR + 0.95% for interest payment dates from next day of June 15, 2031 through June 15, 2046
6M Euro Yen LIBOR + 1.70% for interest payment dates from next day of June 15, 2046
- 0.97% per annum from next day of Issue Date through June 15, 2031
6M Euro Yen LIBOR + 1.10% for interest payment dates from next day of June 15, 2031 through June 15, 2051
6M Euro Yen LIBOR + 1.85% for interest payment dates from next day of June 15, 2051
- 1.31% per annum from next day of Issue Date through June 15, 2036
6M Euro Yen LIBOR + 1.30% for interest payment dates from next day of June 15, 2036 through June 15, 2056
6M Euro Yen LIBOR + 2.05% for interest payment dates from next day of June 15, 2056

Early Redemption/Purchase:	1st Series Subordinated Bonds: Early redemption after a lapse of 5 years from the bond issuance 2nd Series Subordinated Bonds: Early redemption after a lapse of 10 years from the bond issuance 3rd Series Subordinated Bonds: Early redemption after a lapse of 15 years from the bond issuance Early redemption upon occurrence of Tax Events or Rating Events Purchase
Replacement:	There has been representation of intention for replacement
Optional Interest Suspension:	The Issuer may suspend interest payments at its discretion
Mandatory Interest Suspension:	No provisions
Accumulation/Non-Accumulation:	Accumulation
Ranking of Claims:	The Subordinated Bonds are subordinated to all debts (excluding the Subordinated Bonds and the subordinated debts ranking pari passu with the Subordinated Bonds) and on par with preferred stocks

INFORMATION DISCLOSURE FORM

Japan Credit Rating Agency, Ltd.

Disclosure Required by Paragraph (a)(1)(ii) of Rule 17g-7

Issuer:	ENEOS Holdings, Inc.
Rating Publication Date:	June 9, 2021

1 The Symbol, Number, or Score in the Rating Scale used to Denote Credit Rating Categories and Notches and, the Identity of the Obligor or the Identity and a Description of the Security or Money Market Instrument as Required by Paragraph (a)(1)(ii)(A) of Rule 17g-7

- Please see the news release. If the credit rating is a private rating, please see the report for private rating.

2 The version of the procedure or methodology used to determine the credit rating; as Required by Paragraph (a)(1)(ii)(B) of Rule 17g-7

- Please see the news release. If the credit rating is a private rating, please see the report for private rating.

3 The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7

- The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and business environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees.
- The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.

A) Business Bases

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

B) Financial Grounds and Asset Quality

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

C) Liquidity Positions

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The likelihood of debt payment is affected one way or the other by the issuer's related parties such as parent company, subsidiary, guarantor, and the government of the issuer's business domicile, etc. - by their own conditions and/ or position of support/ assistance for the issuer.

E) Order of Seniority in Debt Payment

The likelihood of debt payment can be different between given debts of the same issuer. The likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment which is determined by design as financial product or by laws, etc.

4 The Potential Limitations of the Credit Rating as Required by Paragraph (a)(1)(ii)(D) of Rule 17g-7

- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- The objective of the credit rating herewith presented does not include any concerns other than the likelihood of debt payment, such as risks of price changes, market liquidity, etc.
- The credit rating herewith presented is necessary to be reviewed along with possible changes of the issuer of rated objects in its business performance and/ or circumstances which include regulatory environment, and hence subject to possible alteration.

5 Information on the Uncertainty of the Credit Rating as Required by Paragraph (a)(1)(ii)(E) of Rule 17g-7

- The information used for the determination of credit rating as herewith presented is obtained by JCR from the issuer of rated objects and other sources that JCR trusts in terms of accuracy and reliability but possibly contains errors due to human, non-human or other causes. Consequently, the credit rating determined on the grounds of such information does not constitute, explicitly or implicitly, any representation or warrant of JCR on the information itself or any consequences of its use in terms of accuracy, relevance, timeliness, wholeness, market value, or usefulness for any specific purposes.

6 Use of Due Diligence Services of a Third Party in Taking the Rating Action as Required by Paragraph (a)(1)(ii)(F) of Rule 17g-7

- There is no use of any third-party due diligence service in the determination of the credit rating herewith presented.

7 Use of Servicer or Remittance Reports to Conduct Surveillance of the Credit Rating Required by Paragraph (a)(1)(ii)(G) of Rule 17g-7

- There is no use of any servicer or remittance report to conduct surveillance of the credit rating herewith presented.

8 The Types of Data Relied Upon for the Purpose of Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(H) of Rule 17g-7

- The information posted in the below, which includes data, is used for the determination of the credit rating herewith presented.

- A) Audited financial statements presented by the rating stakeholders
- B) Explanations of business performance, management plans, etc. presented by the rating stakeholders
- C) Documentation of the rated financial product presented by the rating stakeholders

9 Overall assessment of the Quality of Information Available and Considered in Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(I) of Rule 17g-7

- JCR holds its basic policies for securing the quality of information as a base of due diligence for the determination of credit ratings. The information used as a base for the determination of credit rating herewith presented satisfies such policies, which include the audit by an independent auditor, the warranty made by the issuer, the publication by the issuer, some independent media or, otherwise, JCR analyst's scrutiny, etc.
- JCR sees no particular weakness in the quality of information used for the determination of the credit rating herewith presented as compared to the information used in other cases of the credit rating for comparable issuers or ratable objects.
- If the credit rating is an Indication, please see the report for Indication.

10 Information Relating to Conflicts of Interest as Required by Paragraph (a)(1)(ii)(J) of Rule 17g-7

- JCR receives payment of compensation for the determination of the credit rating herewith presented from either one of those parties who are issuer, underwriter, depositor or sponsor.
- JCR did not receive in the last fiscal year in the past payment of compensation from the same party for any kind of JCR's service other than the determination of public or private credit rating, such as one in the ancillary business.

11 Explanation or Measure of the Potential Volatility of the Credit Rating as Required by Paragraph (a)(1)(ii)(K) of Rule 17g-7

A) Business Bases

The credit rating is subject to alteration if there is improvement or deterioration of the issuer's business bases, since its revenue, etc. may improve or deteriorate by the change in its business management policies, clients' preferences, competitive situation, or a technological innovation. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the business bases is large.

B) Financial Grounds and Asset Quality

The credit rating is subject to alteration if the issuer increases/ decreases its debt/ capital or vice versa and thereby makes its individual debt payment liability less or more bearable and its loss absorption capacity into the future decreased or increased. Also, the changes in the quality of asset under the issuer's holding may affect the credit rating, since such changes could raise or lower the likelihood of future loss of the issuer's financial grounds. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the financial grounds and/ or asset quality is large.

C) Liquidity Positions

The credit rating is subject to alteration if there is a change in the issuer's financial management policy or in the relations with fund procurement sources and the change thereby makes its liquidity

positions improve or deteriorate. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is large.

D) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

The credit rating is subject to alteration if there is a change in the rated debt's status in the order of seniority relative to other debts caused by the improvement/ deterioration of the issuer's financial condition. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large. Also, in case of the financial products for which non-payment of interest/ principal is contractually permissible, the credit rating is subject to alteration if and when the likelihood of such non-payment is projected to increase or decrease. The resultant alteration of the credit rating could be by a notch but often as much as a few notches.

E) Rise and Fall in General Economy and Markets

The credit rating is subject to alteration if there is a rise/ fall in the general economy and/ or the markets inducing the issuer's revenues/ expenses to increase/ decrease and vice versa, etc. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is exceptionally large.

F) Various Events

The credit rating is subject to alteration on occurrence of various events, such as change in the issuer's major shareholders, M&A and other organizational change, accident, violation of the law, litigation, legal/ regulatory change, natural disaster, etc., which are unforeseeable at the time when the credit rating is determined, causing a significant change on the issuer's business bases, financial grounds, etc. The resultant alteration of the credit rating could be by a notch but more often than not as much as a few notches.

12

Information on the Content of the Credit Rating, Including the Historical Performance of the Credit Rating and the Expected Probability of Default and the Expected Loss in the Event of Default as Required by Paragraph (a)(1)(ii)(L) of Rule 17g-7

- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- Facts of the probability of default are posted as Form NRSRO Exhibit 1 on the JCR website under the URL:

<https://www.jcr.co.jp/en/service/company/regu/nrsro/>

13

Information on the Sensitivity of the Credit Rating to Assumptions Made as Required by Paragraph (a)(1)(ii)(M) of Rule 17g-7

A) Business Bases

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's business bases and powers of earning or cash flow generation, etc. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's business bases on some drastic change in the operational environments, etc.

B) Financial Grounds and Asset Quality

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's financial grounds and asset quality. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's financial grounds and/ or asset quality on some drastic change in its business bases.

C) Liquidity Risks

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's liquidity positions. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much

as a few notches if the development is rapid in improvement or deterioration of the issuer's liquidity positions on some drastic change in its financial management policy or relations with fund procurement sources, etc.

D) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the order of seniority in repayment of interests and principal. JCR assumes the resultant change of the credit rating is most likely by a notch. The change could be as much as a few notches if the issuer's financial structure differs so much and thereby the balance between debts shifted so greatly. Rating change is also possible in case of the financial products for which non-payment of interest/ principal is contractually permissible, if and when the assumptions made at the time of its determination turns out to be inaccurate. The change of the credit rating is assumed to be by a notch but often as much as a few notches.

E) Rise and Fall in General Economy and Markets

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the prospects of general economy and markets. JCR expects the change should be most likely by a notch but could be as much as a few notches, should the economy or the markets change so greatly.

14

Information on the Representations, Warranties, and Enforcement Mechanisms of an Asset-backed Security as Required by Paragraph (a)(1)(ii)(N) of rule 17g-7

- The credit rating herewith presented is not for an ABS product, and hence no relevant issue.

Tel. +81 3 3544 7013, Fax. +81 3 3544 7026

Attestation Required by Paragraph (a)(1)(iii) of Rule 17g-7

I, Shigenobu Tonomura, have responsibility to this Rating Action and to the best of my knowledge:

- A) No part of the credit rating was influenced by any other business activities.
- B) The credit rating was based solely upon the merits of the obligor, security, or money market instrument being rated.
- C) The credit rating was an independent evaluation of the credit risk of the obligor, security, or money market instrument.
