Japan Credit Rating Agency, Ltd.

23-D-1652 March 4, 2024

Japan Credit Rating Agency, Ltd. (JCR) announces the following credit rating.

JGC HOLDINGS CORPORATION (security code: 1963)

<Affirmation>

Long-term Issuer Rating: A+
Outlook: Stable
Bonds: A+
CP: J-1

Rationale

- (1) JGC HOLDINGS CORPORATION (the "Company") is the pure holding company of JGC Group. It is a leading plant engineering group, which handles the EPC (Engineering, Procurement of materials/equipment and Construction) business in an integrated manner. Backed by its advanced project management ability and engineering technological ability, it has earned a deep trust of customers and rich track records in the construction of energy/chemical plants both in Japan and overseas. In particular, it is positioned as a leading contractor for LNG plants, and is also involved in offshore LNG plants. In addition to the EPC business, the Company is also engaged in the production of functional materials such as catalysts and fine chemicals. The ratings reflect the creditworthiness of the entire group, as the Company has strong governance over its operating companies and strong group unity.
- (2) Operating income is expected to decline in the fiscal year ending March 2024 (FY2023), as the profitability of several domestic and overseas projects has deteriorated and the Company recorded losses, including an expected increase in future costs. However, given the size of the current order backlog and its high ability to execute projects, the Company will likely be able to recover earnings quickly. In addition, its strong financial base is assumed to be maintained, and JCR has affirmed the ratings on the Company with Stable outlook. JCR will follow up on whether additional losses will occur in projects whose profitability has deteriorated recently.
- (3) For FY2023, the Company announced its forecasts, such as net sales of 800 billion yen (up 31.8% year on year) and an operating income of 16 billion yen (down 56.4% year on year). As mentioned above, deterioration in project profitability is expected to be the main factor behind the decline in profits. On the other hand, the backlog of engineering-related orders as of the end of December 2023 exceeded 1 trillion yen. Additionally, the Company is planning to receive orders of a reasonable size in the fourth quarter of FY2023 or early FY2024, which are expected to contribute to the Company's earnings over the medium term. As the global movement towards decarbonization continues, it is thought that a shift from fossil fuels to clean energy such as hydrogen and SAF will continue going forward. The Company is expanding its business domain in these areas where growth is expected, and JCR will continue to pay attention to its efforts.
- (4) The EPC business involves various risks including country risk. On the other hand, as of the end of the third quarter of FY2023, the Company's equity was 401.9 billion yen, the equity ratio was 52.9% and the net cash position was kept, showing a strong financial base that can withstand these risks. The Company plans to implement strategic investments totaling 200 billion yen in the period from FY2020 through FY2025, but given the size of its cash flow generation capacity and liquidity on hand, the Company will likely be able to maintain the sound financial position

- The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7
 - The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and business environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees.
 - The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.

A) Business Bases

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

B) Financial Grounds and Asset Quality

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

C) Liquidity Positions

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

- D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

 The likelihood of debt payment is affected one way or the other by the issuer's related parties such as parent company, subsidiary, guarantor, and the government of the issuer's business domicile, etc. by their own conditions and/ or position of support/ assistance for the issuer.
- E) Order of Seniority in Debt Payment

 The likelihood of debt payment can be different between given debts of the same issuer. The likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment which is determined by design as financial product or by laws, etc.
- 4 The Potential Limitations of the Credit Rating as Required by Paragraph (a)(1)(ii)(D) of Rule 17g-7
 - The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood.  - The objective of the credit rating herewith presented does not include any concerns other than the likelihood of debt payment, such as risks of price changes, market liquidity, etc.
 - The credit rating herewith presented is necessary to be reviewed along with possible changes of the issuer of rated objects in its business performance and/ or circumstances which include regulatory environment, and hence subject to possible alteration.

A) Business Bases

The credit rating is subject to alteration if there is improvement or deterioration of the issuer's business bases, since its revenue, etc. may improve or deteriorate by the change in its business management policies, clients' preferences, competitive situation, or a technological innovation. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the business bases is large.

B) Financial Grounds and Asset Quality

The credit rating is subject to alteration if the issuer increases/ decreases its debt/ capital or vice versa and thereby makes its individual debt payment liability less or more bearable and its loss absorption capacity into the future decreased or increased. Also, the changes in the quality of asset under the issuer's holding may affect the credit rating, since such changes could raise or lower the likelihood of future loss of the issuer's financial grounds. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the financial grounds and/ or asset quality is large.

C) Liquidity Positions

The credit rating is subject to alteration if there is a change in the issuer's financial management policy or in the relations with fund procurement sources and the change thereby makes its liquidity positions improve or deteriorate. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is large.

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The credit rating is subject to alteration if there is a change in the issuer's parent company or subsidiary, guarantor or other provider of credit enhancement, or the government of the issuer's business domicile, or other related parties' own conditions and/ or position of support/ assistance for the issuer, and the change thereby makes its business bases, financial grounds and/ or liquidity positions improve or deteriorate, and/ or making the effectiveness of guarantee and other credit enhancement improve or deteriorate. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large.

E) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

The credit rating is subject to alteration if there is a change in the rated debt's status in the order of seniority relative to other debts caused by the improvement/ deterioration of the issuer's financial condition. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large. Also, in case of the financial products for which non-payment of interest/ principal is contractually permissible, the credit rating is subject to alteration if and when the likelihood of such non-payment is projected to increase or decrease. The resultant alteration of the credit rating could be by a notch but often as much as a few notches.

F) Rise and Fall in General Economy and Markets

The credit rating is subject to alteration if there is a rise/ fall in the general economy and/ or the markets inducing the issuer's revenues/ expenses to increase/ decrease and vice versa, etc. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is exceptionally large.

G) Various Events

The credit rating is subject to alteration on occurrence of various events, such as change in the issuer's major shareholders, M&A and other organizational change, accident, violation of the law, litigation, legal/ regulatory change, natural disaster, etc., which are unforeseeable at the time when the credit rating is determined, causing a significant change on the issuer's business bases, financial grounds, etc. The resultant alteration of the credit rating could be by a notch but more often than not as much as a few notches.
