

Japan Credit Rating Agency, Ltd. (JCR) announces the following credit rating.

## **Dai-ichi Life Holdings, Inc. (security code: 8750)**

<Assignment>

Bonds (Undated subordinated bonds): Preliminary A-

### *Rationale*

<Issuer's Profile>

Dai-ichi Life Holdings, Inc. (the "Company") is insurance holding company of the Dai-ichi Life Group (the "Group"), Japan's second largest life insurance group, in terms of the amount of policies in force. It has The Dai-ichi Life Insurance Company, Limited, The Dai-ichi Frontier Life Insurance Co., Ltd., The Neo First Life Insurance Company, Limited, U.S.-based Protective Life Corporation and other companies under its umbrella. Primarily engaging in the domestic life insurance business, it also operates in the areas of overseas life insurance, asset management, etc. The Group's management system stands out from that of other life insurance groups in that, for instance, the Company is the only joint-stock company among four leading life insurance companies and adopts a holding company structure. Since its listing in 2010, the Company has been taking various measures to enhance its corporate value, including responding to the varying needs of customers in the domestic market and aggressively expanding overseas operations. With the diversification of earnings sources, gaps between the Group's consolidated results and the core company's non-consolidated results are beginning to get wider.

Factors reflected in the Group's creditworthiness include the strong operating base in Japan, stable earnings capacity with advancement in diversification and capital adequacy against risks. JCR determined the long-term issuer rating for the Company at A+/Stable, one notch below that for the core company (Dai-ichi Life Insurance: AA-/Stable), which reflects the Group's overall creditworthiness. In light of the Company's high double leverage ratio, while it has good cash flows thanks to the earnings power of its subsidiaries, JCR incorporated into the ratings structurally subordinated nature of creditors of a holding company to those of the subsidiaries. That said, the Company has expressed its intention to lower the double leverage ratio. JCR will thus keep an eye on such factors as the Group's capital policy and balance between the Company's own debt and capital financing.

<Rationale for Rating on Securities>

JCR preliminarily rated the Subordinated Bonds at a level two notches below the long-term issuer rating for the Company.

In rating hybrid securities including subordinated bonds, JCR sees: (i) the probability of deferral of interest or dividend payments in accordance with the deferral clause (probability of deferral) is usually higher than the probability of the Company's falling into default (probability of default); and (ii) ranking of claims at the time of bankruptcy is subordinated to the ranking of ordinary debts, and as a result, the probability of recovery is low (subordination property).

Ranking of claims to the Subordinated Bonds at the time of the Company's bankruptcy ranks *pari passu* with the preferred stock and is subordinated to all debts (excluding the Subordinated Bonds and the subordinated debts ranking *pari passu* with the Subordinated Bonds). Furthermore, mandatory and optional interest suspension clauses are stipulated for the interest payments. JCR views that the probability of the actual suspension of the interest payments is low at the moment, taking into account, among others, the Company's financial conditions. JCR decided the notching from the long-term issuer rating in light of such subordination property and the deferral clause.

<Assessment of Equity Content of Securities and Rationale>

JCR determined the equity content of the Subordinated Bonds at “medium” or “50” (against 100 of a stock).

JCR takes into account that “there is no obligation to redeem principal or no maturity,” “there is no obligation to pay dividends” and “ranking of claims at the time of bankruptcy is subordinated” when assessing the equity content of hybrid securities.

While the Subordinated Bonds are undated bonds with no maturity, early redemption is possible after a lapse of 10 years from the bond issuance. In addition, early redemption or purchase upon occurrence of Regulation Events, Tax Events or Rating Events owing to changes in the assessment of equity content by a credit rating agency is possible. Moreover, as the interest rate will step up by approximately 100 bps after a lapse of 10 years from the bond issuance, the incentives for early redemption are high. As conditions for early redemption, however, the Company is required to maintain a satisfactory regulatory capital ratio or raise capital etc. in the amount exceeding the redemption amount and to obtain prior approval from the Commissioner of the Financial Services Agency only when such approval is necessary. The Company also has strong incentives to maintain and strengthen the financial base for the entire Group from the viewpoints of maintaining business characteristics and remaining competitive. JCR therefore considers it is extremely unlikely that the Company will make an early redemption or a purchase that will impair the financial bases of both the Company and the Group and incorporated this view into the assessment of the effective redemption obligation and maturity. This judgment reflects, along with other factors, that: (i) JCR, based on hearing from the Company, was able to ascertain the Company’s future financial management policy including the position of the Subordinated Bonds; and (ii) the Group has long been winning confidence of investors and creditors by maintaining good relations with them in the financial market.

As for the interest, despite the provision of a mandatory interest suspension clause, conditions for activation of this clause are far from the ones that can surely stop the interest payments prior to bankruptcy. However, the optional interest suspension clause provides a mechanism whereby the interest payments can be suspended in a stressful situation. JCR, in assessing the equity content, took into consideration these mechanisms for maturity and interest suspension, as well as other factors including the ranking of claims to the Subordinated Bonds being subordinated to the ranking of claims to the senior obligations of the Company at the time of bankruptcy.

Kiichi Sugiura, Tomohiro Miyao for Issuer

Kiichi Sugiura, Akira Minamisawa for Hybrid Securities

**Rating**

Issuer: Dai-ichi Life Holdings, Inc.

<Assignment>

Issue	Amount	Issue Date	Due Date	Coupon	Preliminary Rating
2nd Series Deferrable Interest Unsecured Undated Subordinated Bonds					
	TBD	(Note 1)	No Maturity	(Note 2)	A-

Notes:

- Bonds will be issued in 2019. Details will be determined on the same date as the coupon rate.
- Approximately 100 bps step-up is scheduled after a lapse of 10 years from the Issue Date.

Early Redemption/Purchase: Early redemption after a lapse of 10 years from the bond issuance  
Redemption upon occurrence of Regulation Events, Tax Events or Rating Events  
Purchase

Replacement: No replacement language in the offering circular for bonds, etc.; however, the Issuer must meet requirements for redemption/purchase, including the maintenance of consolidated solvency margin ratio

Optional Interest Suspension: The Issuer may suspend interest payments at its discretion.

Mandatory Interest Suspension: In cases where there is shortage of regulatory capital or prompt corrective action by authority

Accumulation/Non-Accumulation: Accumulation

Ranking of Claims: The Subordinated Bonds are subordinated to all debts (excluding the Subordinated Bonds and the subordinated debts ranking pari passu with the Subordinated Bonds) and rank pari passu with the preferred stock.

<Reference>

Long-term Issuer Rating: A+      Outlook: Stable

Rating Assignment Date: August 6, 2019

The criteria used for identifying matters which serve as assumptions for the assessment of the credit status, and the criteria used for setting of grades indicating the results of the assessments of the credit status are published as "Types of Credit Ratings and Definitions of Rating Symbols" (January 6, 2014) in Information about JCR Ratings on JCR's website (<https://www.jcr.co.jp/en/>).

Outline of methodology for determination of the credit rating is shown as "JCR's Rating Methodology" (November 7, 2014), "Life Insurance" (July 1, 2013), "Rating Methodology for Financial Groups' Holding Companies and Group Companies" (March 29, 2019), "Rating Methodology for Assessment of Hybrid Securities' Equity Content" (July 27, 2017), "Ratings of Hybrid Securities" (September 10, 2012) and "Rating Methodology for Financial Institutions' Capital and TLAC Instruments" (April 27, 2017) in Information about JCR Ratings on JCR's website (<https://www.jcr.co.jp/en/>).

**Glossary:**

A preliminary rating is a credit rating assigned as a preliminary evaluation while material terms for issue to be rated are not yet finalized. When the issuing terms are finalized, JCR will confirm them and will assign a credit rating anew. The rating level of the final rating may be different from that of the preliminary rating, depending on the final content of the terms, etc.

## INFORMATION DISCLOSURE FORM

Japan Credit Rating Agency, Ltd.

### Disclosure Required by Paragraph (a)(1)(ii) of Rule 17g-7

Issuer:	Dai-ichi Life Holdings, Inc.
Rating Publication Date:	August 9, 2019

**1** The Symbol, Number, or Score in the Rating Scale used to Denote Credit Rating Categories and Notches and, the Identity of the Obligor or the Identity and a Description of the Security or Money Market Instrument as Required by Paragraph (a)(1)(ii)(A) of Rule 17g-7

- Please see the news release.

**2** The version of the procedure or methodology used to determine the credit rating; as Required by Paragraph (a)(1)(ii)(B) of Rule 17g-7

- Please see the news release.

**3** The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7

- The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and business environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees.
- The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.

**A) Business Bases**

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

**B) Financial Grounds and Asset Quality**

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

**C) Liquidity Positions**

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The likelihood of debt payment is affected one way or the other by the issuer's related parties such as parent company, subsidiary, guarantor, and the government of the issuer's business domicile, etc. - by their own conditions and/ or position of support/ assistance for the issuer.

E) Order of Seniority in Debt Payment

The likelihood of debt payment can be different between given debts of the same issuer. The likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment which is determined by design as financial product or by laws, etc.

4 The Potential Limitations of the Credit Rating as Required by Paragraph (a)(1)(ii)(D) of Rule 17g-7

- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- The objective of the credit rating herewith presented does not include any concerns other than the likelihood of debt payment, such as risks of price changes, market liquidity, etc.
- The credit rating herewith presented is necessary to be reviewed along with possible changes of the issuer of rated objects in its business performance and/ or circumstances which include regulatory environment, and hence subject to possible alteration.

5 Information on the Uncertainty of the Credit Rating as Required by Paragraph (a)(1)(ii)(E) of Rule 17g-7

- The information used for the determination of credit rating as herewith presented is obtained by JCR from the issuer of rated objects and other sources that JCR trusts in terms of accuracy and reliability but possibly contains errors due to human, non-human or other causes. Consequently, the credit rating determined on the grounds of such information does not constitute, explicitly or implicitly, any representation or warrant of JCR on the information itself or any consequences of its use in terms of accuracy, relevance, timeliness, wholeness, market value, or usefulness for any specific purposes.

6 Use of Due Diligence Services of a Third Party in Taking the Rating Action as Required by Paragraph (a)(1)(ii)(F) of Rule 17g-7

- There is no use of any third-party due diligence service in the determination of the credit rating herewith presented.

7 Use of Servicer or Remittance Reports to Conduct Surveillance of the Credit Rating Required by Paragraph (a)(1)(ii)(G) of Rule 17g-7

- There is no use of any servicer or remittance report to conduct surveillance of the credit rating herewith presented.

8 The Types of Data Relied Upon for the Purpose of Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(H) of Rule 17g-7

- The information posted in the below, which includes data, is used for the determination of the credit rating herewith presented.

- A) Audited financial statements presented by the rating stakeholders
- B) Explanations of business performance, management plans, etc. presented by the rating stakeholders
- C) Documentation of the rated financial product presented by the rating stakeholders

## 9 Overall assessment of the Quality of Information Available and Considered in Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(I) of Rule 17g-7

- JCR holds its basic policies for securing the quality of information as a base of due diligence for the determination of credit ratings. The information used as a base for the determination of credit rating herewith presented satisfies such policies, which include the audit by an independent auditor, the publication by the issuer or some independent media or, otherwise, JCR analyst's scrutiny, etc.
- JCR sees no particular weakness in the quality of information used for the determination of the credit rating herewith presented as compared to the information used in other cases of the credit rating for comparable issuers or ratable objects.

## 10 Information Relating to Conflicts of Interest as Required by Paragraph (a)(1)(ii)(J) of Rule 17g-7

- JCR receives payment of compensation for the determination of the credit rating herewith presented from either one of those parties who are issuer, underwriter, depositor or sponsor.
- JCR did not receive in the last fiscal year in the past payment of compensation from the same party for any kind of JCR's service other than the determination of credit rating, such as one in the ancillary business.

## 11 Explanation or Measure of the Potential Volatility of the Credit Rating as Required by Paragraph (a)(1)(ii)(K) of Rule 17g-7

### A) Business Bases

The credit rating is subject to alteration if there is improvement or deterioration of the issuer's business bases, since its revenue, etc. may improve or deteriorate by the change in its business management policies, clients' preferences, competitive situation, or a technological innovation. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the business bases is large.

### B) Financial Grounds and Asset Quality

The credit rating is subject to alteration if the issuer increases/ decreases its debt/ capital or vice versa and thereby makes its individual debt payment liability less or more bearable and its loss absorption capacity into the future decreased or increased. Also, the changes in the quality of asset under the issuer's holding may affect the credit rating, since such changes could raise or lower the likelihood of future loss of the issuer's financial grounds. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the financial grounds and/ or asset quality is large.

### C) Liquidity Positions

The credit rating is subject to alteration if there is a change in the issuer's financial management policy or in the relations with fund procurement sources and the change thereby makes its liquidity positions improve or deteriorate. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is large.

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The credit rating is subject to alteration if there is a change in the issuer's parent company or subsidiary, guarantor or other provider of credit enhancement, or the government of the issuer's business domicile, or other related parties' own conditions and/ or position of support/ assistance for the issuer, and the change thereby makes its business bases, financial grounds and/ or liquidity positions improve or deteriorate, and/ or making the effectiveness of guarantee and other credit enhancement improve or deteriorate. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large.

E) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

The credit rating is subject to alteration if there is a change in the rated debt's status in the order of seniority relative to other debts caused by the improvement/ deterioration of the issuer's financial condition. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large. Also, in case of the financial products for which non-payment of interest/ principal is contractually permissible, the credit rating is subject to alteration if and when the likelihood of such non-payment is projected to increase or decrease. The resultant alteration of the credit rating could be by a notch but often as much as a few notches.

F) Rise and Fall in General Economy and Markets

The credit rating is subject to alteration if there is a rise/ fall in the general economy and/ or the markets inducing the issuer's revenues/ expenses to increase/ decrease and vice versa, etc. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is exceptionally large.

G) Various Events

The credit rating is subject to alteration on occurrence of various events, such as change in the issuer's major shareholders, M&A and other organizational change, accident, violation of the law, litigation, legal/ regulatory change, natural disaster, etc., which are unforeseeable at the time when the credit rating is determined, causing a significant change on the issuer's business bases, financial grounds, etc. The resultant alteration of the credit rating could be by a notch but more often than not as much as a few notches.

12

Information on the Content of the Credit Rating, Including the Historical Performance of the Credit Rating and the Expected Probability of Default and the Expected Loss in the Event of Default as Required by Paragraph (a)(1)(ii)(L) of Rule 17g-7

- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- Facts of the probability of default are posted as Form NRSRO Exhibit 1 on the JCR website under the URL:

<https://www.jcr.co.jp/en/service/company/regu/nrsro/>

13

Information on the Sensitivity of the Credit Rating to Assumptions Made as Required by Paragraph (a)(1)(ii)(M) of Rule 17g-7

A) Business Bases

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's business bases and powers of earning or cash flow generation, etc. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's business bases on some drastic change in the operational environments, etc.

B) Financial Grounds and Asset Quality

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's financial grounds and asset quality. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but

possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's financial grounds and/ or asset quality on some drastic change in its business bases.

C) Liquidity Risks

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's liquidity positions. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's liquidity positions on some drastic change in its financial management policy or relations with fund procurement sources, etc.

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's parent company or subsidiaries, guarantor or other providers of credit enhancement, the government of the issuer's business domicile or other related parties' status and stance of support/ assistance for the issuer. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if there is a major change on the part of related parties, such as replacement, disappearance, some drastic improvement/ deterioration of financial grounds/ balances, etc.

E) Rise and Fall in General Economy and Markets

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the prospects of general economy and markets. JCR expects the change should be most likely by a notch but could be as much as a few notches, should the economy or the markets change so greatly.

## 14 Information on the Representations, Warranties, and Enforcement Mechanisms of an Asset-backed Security as Required by Paragraph (a)(1)(ii)(N) of rule 17g-7

- The credit rating herewith presented is not for an ABS product, and hence no relevant issue.

### **Japan Credit Rating Agency, Ltd.**

Tel. +81 3 3544 7013, Fax. +81 3 3544 7026

## Attestation Required by Paragraph (a)(1)(iii) of Rule 17g-7

I, Shozo Matsumura, have responsibility to this Rating Action and to the best of my knowledge:

- A) No part of the credit rating was influenced by any other business activities.
- B) The credit rating was based solely upon the merits of the obligor, security, or money market instrument being rated.
- C) The credit rating was an independent evaluation of the credit risk of the obligor, security, or money market instrument.
