Japan Credit Rating Agency, Ltd.

21-D-1218 February 18, 2022

Japan Credit Rating Agency, Ltd. (JCR) announces the following credit rating.

NH Foods Ltd. (security code: 2282)

<Affirmation>

Long-term Issuer Rating: A+
Outlook: Stable
Bonds: A+
CP: J-1

Rationale

- (1) NH Foods Ltd. (the "Company") is one of Japan's leading food manufacturers. Its business base is solid as shown by the largest domestic sales share for fresh meats, and others. The Company's strength lies in its vertical integration system, which encompasses everything from livestock production and raising to slaughtering, processing, distribution, and sales. It also handles processed foods including ham and sausages, deli foods, marine products and dairy products, with a high market share and brand power in many product groups.
- (2) The stable earnings base is maintained. While rising raw material prices are a cause for concern, the impact is limited by the business portfolio that handles a variety of livestock species and items domestically and overseas. In February 2022, the Company started to implement changes to product standards and price revisions for ham and sausages, and other processed foods. In addition to measures to improve profitability, JCR will be paying attention to whether it can absorb the upward pressure on costs. Based on stable meat demand as well, the Company will be able to continue to secure a certain level of earnings going forward, in JCR's view. Investments will likely remain at a high level for the time being, but its favorable financial structure is expected to be kept. Based on the above, JCR has affirmed the ratings on the Company with Stable outlook.
- (3) For the fiscal year ending March 2022 (FY2021), the Company forecasts a business profit (IFRS) of 48 billion yen, down 8.4% year on year. Demand for homemade meals is robust, but higher feed prices and fuel costs are expected to have a negative impact on profits. Under the medium-term management plan 2023 (from FY2021 to FY2023), the Company intends to further strengthen initiatives such as improving business efficiency and productivity through DX investments, and building an optimal production system. The Company is also working to strengthen its procurement and sales capabilities domestically and overseas, and to stabilize the performance of its overseas businesses. While it is necessary to pay attention to trends in the external environment, JCR will continue to monitor whether the effects of the medium-term management plan will expand its earnings base over the medium to long term.
- (4) The ratio of equity attributable to owners of the parent was 51.1% at the end of the third quarter of FY2021 (52.5% at the end of FY2020). Although the financial structure deteriorated slightly due to an increase in interest-bearing debt, it stays at a favorable level. Phases in which interest-bearing debts surge going forward are anticipated, because of planned investments in a new baseball stadium construction and DX-related initiatives, in addition to maintenance and renewal costs. However, the Company intends to stick to a certain level of financial discipline in consideration of financial stability, and JCR believes that its financial concerns will be limited.

 - The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.

A) Business Bases

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

B) Financial Grounds and Asset Quality

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

C) Liquidity Positions

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

- D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

 The likelihood of debt payment is affected one way or the other by the issuer's related parties such as parent company, subsidiary, guarantor, and the government of the issuer's business domicile, etc. by their own conditions and/ or position of support/ assistance for the issuer.
- E) Order of Seniority in Debt Payment

 The likelihood of debt payment can be different between given debts of the same issuer. The likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment which is determined by design as financial product or by laws, etc.

A) Business Bases

The credit rating is subject to alteration if there is improvement or deterioration of the issuer's business bases, since its revenue, etc. may improve or deteriorate by the change in its business management policies, clients' preferences, competitive situation, or a technological innovation. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the business bases is large.

B) Financial Grounds and Asset Quality

The credit rating is subject to alteration if the issuer increases/ decreases its debt/ capital or vice versa and thereby makes its individual debt payment liability less or more bearable and its loss absorption capacity into the future decreased or increased. Also, the changes in the quality of asset under the issuer's holding may affect the credit rating, since such changes could raise or lower the likelihood of future loss of the issuer's financial grounds. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the financial grounds and/ or asset quality is large.

C) Liquidity Positions

The credit rating is subject to alteration if there is a change in the issuer's financial management policy or in the relations with fund procurement sources and the change thereby makes its liquidity positions improve or deteriorate. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is large.

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The credit rating is subject to alteration if there is a change in the issuer's parent company or subsidiary, guarantor or other provider of credit enhancement, or the government of the issuer's business domicile, or other related parties' own conditions and/ or position of support/ assistance for the issuer, and the change thereby makes its business bases, financial grounds and/ or liquidity positions improve or deteriorate, and/ or making the effectiveness of guarantee and other credit enhancement improve or deteriorate. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large.

E) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

The credit rating is subject to alteration if there is a change in the rated debt's status in the order of seniority relative to other debts caused by the improvement/ deterioration of the issuer's financial condition. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large. Also, in case of the financial products for which non-payment of interest/ principal is contractually permissible, the credit rating is subject to alteration if and when the likelihood of such non-payment is projected to increase or decrease. The resultant alteration of the credit rating could be by a notch but often as much as a few notches.
