Long-term Issuer Rating: AA-  
Outlook: Stable

## **The Juhachi-Shinwa Bank, Ltd. (security code: -)**

<Affirmation>

Long-term Issuer Rating: AA-  
Outlook: Stable

## **THE FUKUOKA CHUO BANK, LTD. (security code: -)**

<Assignment>

Long-term Issuer Rating: AA-  
Outlook: Stable

### **Rationale**

- (1) The Fukuoka Financial Group (the "Group") is a regional financial group having THE BANK OF FUKUOKA, LTD. ("FUKUOKA BANK"), The Kumamoto Bank, Ltd. ("Kumamoto Bank"), The Juhachi-Shinwa Bank, Ltd. ("Juhachi-Shinwa Bank") and others under the umbrella of Fukuoka Financial Group, Inc. ("FFG") as the holding company. In October 2023, THE FUKUOKA CHUO BANK, LTD. ("FUKUOKA CHUO BANK") became a wholly owned subsidiary. The Group operates widely in Kyushu, and its total fund volume of 22 trillion yen is largest in the industry. While the four subsidiary banks maintain their own brands in the respective service areas, functions like corporate planning and risk management are concentrated to FFG under the leadership of FUKUOKA BANK. The Group as a whole is improving efficiency by utilizing the common infrastructure. JCR deems the Group's creditworthiness to be equivalent to AA- in consideration of such factors as the solid business base, good earning capacity and decent capital level.
- (2) Core net business income (excluding gains on cancellation of investment trusts) of the four banks combined has been strong. Not only loan balance is increasing steadily, except for loans to Government, etc., but also the decline in loan yields is curbing, pushing up loan interest. In the market division, the impact of higher foreign currency financing costs has been offset by portfolio replacement and hedging to achieve certain earnings. Net fees and commissions are also strong, especially for the assets under management business. In terms of expenses, they dropped sharply in the fiscal year ended March 2022 (FY2021) and again in FY2022 thanks in part to synergies arising from the merger for Juhachi-Shinwa Bank. Even though they include the holding company's expenses, upfront investments in Minna Bank, a digital bank, and other costs on a consolidated basis, JCR assumes that the good earnings capacity will be maintained into the future, centering on loan interest and net fees/commissions.

- (3) Soundness of assets is maintained. Non-performing loans ratio under the Financial Reconstruction Act of the four banks combined is low at around 1.7%, and credit cost ratio, too, is kept extremely low. While attention should be paid to changes in business conditions of borrowers caused by soaring raw material prices, etc., JCR expects that factors like the thorough credit management system, sufficient reserves based on the DCF method and the provision method based on future economic forecasts will help restrain a sharp rise in credit costs. In securities investment, the Group does not take excessive risks. It cuts losses on less profitable foreign bonds and replaces them with other instruments. It is also working to diversify investment targets and methods, and assets other than domestic and foreign interest rates, such as stocks and credit products, are tending to increase. The Group responds to varying risks by utilizing interest rate swaps in accordance with market conditions, enhancing monitoring and so forth.
- (4) As the Group opted for the early adoption of Basel III finalization from the end of March 2023, its consolidated capital adequacy ratio has risen. Capital level adjusted by deducting general allowance for loan losses, etc. from shareholders' equity, based on the full application of Basel III finalization, is comparable to that of other regional banks in JCR's AA- rating category. JCR assumes that capital will be maintained at around the current level with the accumulation of retained earnings going forward, too.

Issuer: Fukuoka Financial Group, Inc.

FFG is the financial holding company of the Group. It was established through the joint stock transfer by FUKUOKA BANK and Kumamoto Bank in April 2007. Its Issuer rating is one notch below the Group's creditworthiness in light of somewhat high double leverage ratio, etc.

Issuer: THE BANK OF FUKUOKA, LTD.

- (1) FUKUOKA BANK is a regional bank headquartered in Fukuoka City, Fukuoka Prefecture with a fund volume of 13.7 trillion yen. It has a solid business base as a leading bank in the prefecture with the share of a bit over 30% for loans. It is increasing loan balance mainly to local customers. It is also working to strengthen the fee business, diversify investment targets and methods in the market division and so forth, thereby achieving high profitability. As the Group's core entity, it is driving overall performance. Its issuer rating is deemed to be at the same level as the Group's creditworthiness in light of such factors as FUKUOKA BANK's core position in the Group.
- (2) Core net business income has been strong. Foreign currency financing costs are tending to increase, which however is offset by growth in loan interest, interest/dividend on securities, etc. Non-performing loans ratio under the Financial Reconstruction Act is kept low at around 1.5%. While it should be noted that there are not a few claims with unique risks, such as real estate non-recourse loans and Ship Finance, FUKUOKA BANK conducts disciplined credit management under the strict screening system.

Issuer: The Kumamoto Bank, Ltd.

- (1) Kumamoto Bank is a regional bank II headquartered in Kumamoto City, Kumamoto Prefecture with a fund volume of 1.7 trillion yen. With a 20% share for loans in the prefecture, it ranks second in its locality. Its issuer rating is deemed to be at the same level as the Group's creditworthiness in light of Kumamoto Bank's strong unity with the Group in terms of business administration such as risk management and also business strategies for products, services, etc.
- (2) Core net business income has been strong, helped by cost reductions, etc. despite a continuous decline in loan yields and loan interest remaining flat. Non-performing loans ratio under the Financial Reconstruction Act stands decent at around 1.5%. Risk-taking in the market division is limited. Securities-to-deposit ratio is low, making both interest rate risk and price fluctuation risk small.

Issuer: The Juhachi-Shinwa Bank, Ltd.

- (1) Juhachi-Shinwa Bank is a regional bank headquartered in Nagasaki City, Nagasaki Prefecture with a fund volume of 5.7 trillion yen. It was created in October 2020 through an absorption-type merger with formerly The Shinwa Bank, Ltd. (Sasebo City) as the surviving company and formerly The Eighteenth Bank, Ltd. (Nagasaki City) as the dissolving company. It has an overwhelming presence in the prefecture with the share of around 60% for loans. Its issuer rating is deemed to be at the same level as the Group's creditworthiness in light of Juhachi-Shinwa Bank's strong unity with the Group in terms of business administration such as risk management and also business strategies for products, services, etc.

- (2) Juhachi-Shinwa Bank achieved drastic cost reductions in FY2021 and again in FY2022 partly because of a cut in the number of its bases by nearly 40% in FY2021 upon management integration, and core net business income has recovered. For the first half of FY2023, although cost reductions have run their course, core net business income is leveling off, helped by growth in net fees and commissions, etc. Non-performing loans ratio under the Financial Reconstruction Act stands decent at around 2%.

Issuer: THE FUKUOKA CHUO BANK, LTD.

- (1) FUKUOKA CHUO BANK is a regional bank II headquartered in Fukuoka City, Fukuoka Prefecture with a fund volume of 530 billion yen. With strength in SME lending, its share for loans in the prefecture is stable at nearly 2%. Its issuer rating is deemed to be at the same level as the Group's creditworthiness in light of FUKUOKA CHUO BANK's strong unity with the Group in terms of business administration such as risk management and also business strategies.
- (2) With loan interest accounting for the majority of earnings, core net business income has been stable. Non-performing loans ratio under the Financial Reconstruction Act is somewhat high at 3%. While loans are diversified into small amounts, there are a slightly large number of ailing borrowers who are left with large uncovered claims relative to earnings. Credit costs have mostly been leveling off in recent years, but a larger amount than full-year core net business income is expected to be reported for the second half of FY2023 due to the introduction of a forward-looking allowance. Risk-taking in the market division is relatively small. Securities-to-deposit ratio is rather low, and the portfolio centers on yen bonds.

INFORMATION DISCLOSURE FORM

Japan Credit Rating Agency, Ltd.

## Disclosure Required by Paragraph (a)(1)(ii) of Rule 17g-7

Issuer:	Fukuoka Financial Group, Inc.
Issuer:	THE BANK OF FUKUOKA, LTD.
Issuer:	The Kumamoto Bank, Ltd.
Issuer:	The Juhachi-Shinwa Bank, Ltd.
Issuer:	THE FUKUOKA CHUO BANK, LTD.
Rating Publication Date:	December 22, 2023

1

The Symbol, Number, or Score in the Rating Scale used to Denote Credit Rating Categories and Notches and, the Identity of the Obligor or the Identity and a Description of the Security or Money Market Instrument as Required by Paragraph (a)(1)(ii)(A) of Rule 17g-7

- Please see the news release. If the credit rating is a private rating, please see the report for private rating.

2

The version of the procedure or methodology used to determine the credit rating; as Required by Paragraph (a)(1)(ii)(B) of Rule 17g-7

- Please see the news release. If the credit rating is a private rating, please see the report for private rating.

3

The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7

- The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and business environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees.
- The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.

A) Business Bases

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

B) Financial Grounds and Asset Quality

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

C) Liquidity Positions

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The likelihood of debt payment is affected one way or the other by the issuer's related parties such as parent company, subsidiary, guarantor, and the government of the issuer's business domicile, etc. - by their own conditions and/ or position of support/ assistance for the issuer.

E) Order of Seniority in Debt Payment

The likelihood of debt payment can be different between given debts of the same issuer. The likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment which is determined by design as financial product or by laws, etc.

## 4 The Potential Limitations of the Credit Rating as Required by Paragraph (a)(1)(ii)(D) of Rule 17g-7

- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- The objective of the credit rating herewith presented does not include any concerns other than the likelihood of debt payment, such as risks of price changes, market liquidity, etc.
- The credit rating herewith presented is necessary to be reviewed along with possible changes of the issuer of rated objects in its business performance and/ or circumstances which include regulatory environment, and hence subject to possible alteration.

## 5 Information on the Uncertainty of the Credit Rating as Required by Paragraph (a)(1)(ii)(E) of Rule 17g-7

- The information used for the determination of credit rating as herewith presented is obtained by JCR from the issuer of rated objects and other sources that JCR trusts in terms of accuracy and reliability but possibly contains errors due to human, non-human or other causes. Consequently, the credit rating determined on the grounds of such information does not constitute, explicitly or implicitly, any representation or warrant of JCR on the information itself or any consequences of its use in terms of accuracy, relevance, timeliness, wholeness, market value, or usefulness for any specific purposes.

## 6 Use of Due Diligence Services of a Third Party in Taking the Rating Action as Required by Paragraph (a)(1)(ii)(F) of Rule 17g-7

- There is no use of any third-party due diligence service in the determination of the credit rating herewith presented.

## 7 Use of Servicer or Remittance Reports to Conduct Surveillance of the Credit Rating Required by Paragraph (a)(1)(ii)(G) of Rule 17g-7

- There is no use of any servicer or remittance report to conduct surveillance of the credit rating herewith presented.

## 8 The Types of Data Relied Upon for the Purpose of Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(H) of Rule 17g-7

- The information posted in the below, which includes data, is used for the determination of the credit rating herewith presented.

A) Audited financial statements presented by the rating stakeholders

B) Explanations of business performance, management plans, etc. presented by the rating stakeholders

## 9 Overall assessment of the Quality of Information Available and Considered in Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(I) of Rule 17g-7

- JCR holds its basic policies for securing the quality of information as a base of due diligence for the determination of credit ratings. The information used as a base for the determination of credit rating herewith presented satisfies such policies, which include the audit by an independent auditor, the warranty made by the issuer, the publication by the issuer, some independent media or, otherwise, JCR analyst's scrutiny, etc.
- JCR sees no particular weakness in the quality of information used for the determination of the credit rating herewith presented as compared to the information used in other cases of the credit rating for comparable issuers or ratable objects.
- If the credit rating is an Indication, please see the report for Indication.

## 10 Information Relating to Conflicts of Interest as Required by Paragraph (a)(1)(ii)(J) of Rule 17g-7

- JCR receives payment of compensation for the determination of the credit rating herewith presented from either one of those parties who are issuer, underwriter, depositor or sponsor.
- JCR did not receive in the last fiscal year in the past payment of compensation from THE FUKUOKA CHUO BANK, LTD. for any kind of JCR's service other than the determination of public or private credit rating, such as one in the ancillary business.
- JCR received in the last fiscal year in the past payment of compensation from Fukuoka Financial Group, Inc., THE BANK OF FUKUOKA, LTD., The Kumamoto Bank, Ltd., and The Juhachi-Shinwa Bank, Ltd. for any kind of JCR's service other than the determination of public or private credit rating, such as one in the ancillary business.

## 11 Explanation or Measure of the Potential Volatility of the Credit Rating as Required by Paragraph (a)(1)(ii)(K) of Rule 17g-7

A) Business Bases

The credit rating is subject to alteration if there is improvement or deterioration of the issuer's business bases, since its revenue, etc. may improve or deteriorate by the change in its business management

policies, clients' preferences, competitive situation, or a technological innovation. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the business bases is large.

**B) Financial Grounds and Asset Quality**

The credit rating is subject to alteration if the issuer increases/ decreases its debt/ capital or vice versa and thereby makes its individual debt payment liability less or more bearable and its loss absorption capacity into the future decreased or increased. Also, the changes in the quality of asset under the issuer's holding may affect the credit rating, since such changes could raise or lower the likelihood of future loss of the issuer's financial grounds. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the financial grounds and/ or asset quality is large.

**C) Liquidity Positions**

The credit rating is subject to alteration if there is a change in the issuer's financial management policy or in the relations with fund procurement sources and the change thereby makes its liquidity positions improve or deteriorate. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is large.

**D) Related Parties' Status and Stance of Support/ Assistance for the Issuer**

The credit rating is subject to alteration if there is a change in the issuer's parent company or subsidiary, guarantor or other provider of credit enhancement, or the government of the issuer's business domicile, or other related parties' own conditions and/ or position of support/ assistance for the issuer, and the change thereby makes its business bases, financial grounds and/ or liquidity positions improve or deteriorate, and/ or making the effectiveness of guarantee and other credit enhancement improve or deteriorate. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large.

**E) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract**

The credit rating is subject to alteration if there is a change in the rated debt's status in the order of seniority relative to other debts caused by the improvement/ deterioration of the issuer's financial condition. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large. Also, in case of the financial products for which non-payment of interest/ principal is contractually permissible, the credit rating is subject to alteration if and when the likelihood of such non-payment is projected to increase or decrease. The resultant alteration of the credit rating could be by a notch but often as much as a few notches.

**F) Rise and Fall in General Economy and Markets**

The credit rating is subject to alteration if there is a rise/ fall in the general economy and/ or the markets inducing the issuer's revenues/ expenses to increase/ decrease and vice versa, etc. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is exceptionally large.

**G) Various Events**

The credit rating is subject to alteration on occurrence of various events, such as change in the issuer's major shareholders, M&A and other organizational change, accident, violation of the law, litigation, legal/ regulatory change, natural disaster, etc., which are unforeseeable at the time when the credit rating is determined, causing a significant change on the issuer's business bases, financial grounds, etc. The resultant alteration of the credit rating could be by a notch but more often than not as much as a few notches.

12

Information on the Content of the Credit Rating, Including the Historical Performance of the Credit Rating and the Expected Probability of Default and the Expected Loss in the Event of Default as Required by Paragraph (a)(1)(ii)(L) of Rule 17g-7

- Historical records of the credit rating herewith presented are posted in the end of this paper.
- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- Facts of the probability of default are posted as Form NRSRO Exhibit 1 on the JCR website under the URL:

<https://www.jcr.co.jp/en/service/company/regu/nrsro/>

# 13

## Information on the Sensitivity of the Credit Rating to Assumptions Made as Required by Paragraph (a)(1)(ii)(M) of Rule 17g-7

### A) Business Bases

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's business bases and powers of earning or cash flow generation, etc. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's business bases on some drastic change in the operational environments, etc.

### B) Financial Grounds and Asset Quality

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's financial grounds and asset quality. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's financial grounds and/ or asset quality on some drastic change in its business bases.

### C) Liquidity Risks

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's liquidity positions. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's liquidity positions on some drastic change in its financial management policy or relations with fund procurement sources, etc.

### D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's parent company or subsidiaries, guarantor or other providers of credit enhancement, the government of the issuer's business domicile or other related parties' status and stance of support/ assistance for the issuer. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if there is a major change on the part of related parties, such as replacement, disappearance, some drastic improvement/ deterioration of financial grounds/ balances, etc.

### E) Rise and Fall in General Economy and Markets

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the prospects of general economy and markets. JCR expects the change should be most likely by a notch but could be as much as a few notches, should the economy or the markets change so greatly.

# 14

## Information on the Representations, Warranties, and Enforcement Mechanisms of an Asset-backed Security as Required by Paragraph (a)(1)(ii)(N) of rule 17g-7

- The credit rating herewith presented is not for an ABS product, and hence no relevant issue.

## Attestation Required by Paragraph (a)(1)(iii) of Rule 17g-7

I, Tomohiro Miyao, have responsibility to this Rating Action and to the best of my knowledge:

- A) No part of the credit rating was influenced by any other business activities.
- B) The credit rating was based solely upon the merits of the obligor, security, or money market instrument being rated.
- C) The credit rating was an independent evaluation of the credit risk of the obligor, security, or money market instrument.

宮尾 知浩

Tomohiro Miyao

General Manager of Financial Institution Rating Department
