

Japan Credit Rating Agency, Ltd. (JCR) announces the following credit rating.

## **Tokio Marine Holdings, Inc. (security code: 8766)**

<Affirmation>

Long-term Issuer Rating: AAA  
Outlook: Stable

## **Tokio Marine & Nichido Fire Insurance Co., Ltd. (security code: -)**

<Affirmation>

Long-term Issuer Rating: AAA  
Outlook: Stable  
CP: J-1+

### *Rationale*

- (1) Tokio Marine Group is Japan's major non-life insurance group which has Tokio Marine & Nichido Fire Insurance Co., Ltd. ("TMNF"), Nisshin Fire & Marine Insurance Co., Ltd., Tokio Marine & Nichido Life Insurance Co., Ltd. ("TMNL"), and many overseas insurance companies primarily operated in Europe and U.S. under umbrella of its holding company, Tokio Marine Holdings, Inc. As Tokio Marine Group has been engaging in relatively large overseas M&A transactions on the strength of its global brand power, it has built the most diversified business portfolio among major non-life insurance groups in terms of risks and geographical areas. TMNF's rating is the same as the Group's overall creditworthiness, which is considered equivalent to AAA, based on the assessment of the stable and good earnings capacity, capital base, as well as diversified business portfolio, firmly established ERM, etc. JCR does not reflect structurally subordinated nature of a holding company's creditors to those of subsidiaries in the rating on Tokio Marine Holdings, Inc. in light of facts including the fact that the double leverage ratio will remain at around 100%.
- (2) The Group's domestic non-life, domestic life insurance and overseas insurance businesses are well-balanced, and in the new medium-term management plan started in FY2021, it has indicated that it will pursue further business diversification by capturing growth through M&A based on organic growth. In FY2020, impact of natural disasters in Japan calmed down compared to the previous two fiscal years, and the COVID-19 pandemic impact was generally limited, despite the increase of some overseas payments, with a positive contribution to the bottom line in Japan. While the impact of natural disasters in Japan cannot be avoided in the future, JCR believes that the Group will be able to post stable profits, given that profit of domestic non-life insurance business has been basically steady and that it has advanced its building of a well-diversified business portfolio.
- (3) In the domestic non-life insurance business, net premiums written were almost unchanged in FY2020, mainly thanks to the effect of higher revenue through increased fire insurance premium rates. The combined ratio of automobile insurance, which accounts for about 50% of the total, has declined further due to a decrease in the number of accidents caused by the voluntary restraint of going out under the COVID-19 pandemic crisis. Fire insurance, on the other hand, saw an increase in revenue mainly thanks to rate hikes, but there is room for improvement in profitability. It will take some time to secure profitability, and the key point will be whether premium rates and products can be revised appropriately based on the balance of risk and return. It will also be important to expand profits in new types of insurance with high growth potential, such as healthcare and SME. TMNF has an advantage over other major non-life insurers in that it has been able to keep its expense ratio low as a result of the Business Innovation Project completed in FY2012, but it is working on new ways to improve business efficiency in order to strengthen the profitability of its core insurance business. Although it will take some time before the effects of these measures become apparent, JCR will watch how they can enhance the functions and further strengthen its competitiveness in the future. TMNL, which is in charge of the domestic life insurance business, was constrained by the face-to-face sales activities under the COVID-19 pandemic crisis, but as a result of the focusing on sales of protection insurance products and

variable insurance through various sales channels, mainly non-life insurance agents, it secured an increase in annualized premiums for new policies.

- (4) In the overseas insurance business, Tokio Marine Group has built a strong lineup in specialty insurance markets in Europe and U.S. through aggressive M&A transactions. JCR believes that Tokio Marine Group's strength lies in its expertise in managing overseas insurance companies, which has led to the creation of group synergies through a number of large-scale M&A transactions. The Group's strategic investment appetite for overseas business is strong, and it continues to expand the scale and earnings of its overseas insurance business by seizing bolt-on M&A opportunities in parallel with large-scale M&A. JCR will pay attention to the results of its efforts to expand group synergies through global development of specialty insurance centered on Tokio Marine HCC, profit growth of Pure Group, and utilization of Delphi's asset management capabilities.
- (5) The Group has established an integrated management system for earnings and capital with risk concept as the key under the ERM (risk-based management). As shown by the globally linking the business plan to its capital policy, starting with risk appetite, the degree of utilization and establishment of ERM has increased. It has been also ongoingly working on reduction of risks, and the efforts, including control of insurance underwriting risks and reduction of price fluctuation risk from the cross-shareholdings, are contributing to reduction of fluctuations in equity capital and earnings. JCR believes that the Group's consolidated ESR is at a sufficient level to maintain soundness even under considerable stress, given the conservative nature of its calculation criteria.

Tomohiro Miyao, Seito Achiha

### Rating

Issuer: Tokio Marine Holdings, Inc.

<Affirmation>

Long-term Issuer Rating: AAA      Outlook: Stable

Issuer: Tokio Marine & Nichido Fire Insurance Co., Ltd.

<Affirmation>

Long-term Issuer Rating: AAA      Outlook: Stable

CP: J-1+

Maximum: JPY 300 billion

Rating Assignment Date: June 22, 2021

The assumptions for the credit ratings and the definitions of the rating symbols are published as "Types of Credit Ratings and Definitions of Rating Symbols" (January 6, 2014) in Information about JCR Ratings on JCR's website (<https://www.jcr.co.jp/en/>).

Outline of the rating methodology is shown as "JCR's Rating Methodology" (November 7, 2014), "Non-Life Insurance" (July 1, 2013) and "Rating Methodology for Financial Groups' Holding Companies and Group Companies" (March 29, 2019) in Information about JCR Ratings on JCR's website (<https://www.jcr.co.jp/en/>).

1

The Symbol, Number, or Score in the Rating Scale used to Denote Credit Rating Categories and Notches and, the Identity of the Obligor or the Identity and a Description of the Security or Money Market Instrument as Required by Paragraph (a)(1)(ii)(A) of Rule 17g-7

- Please see the news release. If the credit rating is a private rating, please see the report for private rating.

2

The version of the procedure or methodology used to determine the credit rating; as Required by Paragraph (a)(1)(ii)(B) of Rule 17g-7

- Please see the news release. If the credit rating is a private rating, please see the report for private rating.

3

The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7

- The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and business environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees.
- The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.

A) Business Bases

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

B) Financial Grounds and Asset Quality

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

C) Liquidity Positions

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The likelihood of debt payment is affected one way or the other by the issuer's related parties such as parent company, subsidiary, guarantor, and the government of the issuer's business domicile, etc. - by their own conditions and/ or position of support/ assistance for the issuer.

E) Order of Seniority in Debt Payment

The likelihood of debt payment can be different between given debts of the same issuer. The likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment which is determined by design as financial product or by laws, etc.

4 The Potential Limitations of the Credit Rating as Required by Paragraph (a)(1)(ii)(D) of Rule 17g-7

- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- The objective of the credit rating herewith presented does not include any concerns other than the likelihood of debt payment, such as risks of price changes, market liquidity, etc.
- The credit rating herewith presented is necessary to be reviewed along with possible changes of the issuer of rated objects in its business performance and/ or circumstances which include regulatory environment, and hence subject to possible alteration.

5 Information on the Uncertainty of the Credit Rating as Required by Paragraph (a)(1)(ii)(E) of Rule 17g-7

- The information used for the determination of credit rating as herewith presented is obtained by JCR from the issuer of rated objects and other sources that JCR trusts in terms of accuracy and reliability but possibly contains errors due to human, non-human or other causes. Consequently, the credit rating determined on the grounds of such information does not constitute, explicitly or implicitly, any representation or warrant of JCR on the information itself or any consequences of its use in terms of accuracy, relevance, timeliness, wholeness, market value, or usefulness for any specific purposes.

6 Use of Due Diligence Services of a Third Party in Taking the Rating Action as Required by Paragraph (a)(1)(ii)(F) of Rule 17g-7

- There is no use of any third-party due diligence service in the determination of the credit rating herewith presented.

7 Use of Servicer or Remittance Reports to Conduct Surveillance of the Credit Rating Required by Paragraph (a)(1)(ii)(G) of Rule 17g-7

- There is no use of any servicer or remittance report to conduct surveillance of the credit rating herewith presented.

8 The Types of Data Relied Upon for the Purpose of Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(H) of Rule 17g-7

- The information posted in the below, which includes data, is used for the determination of the credit rating herewith presented.

A) Audited financial statements presented by the rating stakeholders

B) Explanations of business performance, management plans, etc. presented by the rating stakeholders

## 9 Overall assessment of the Quality of Information Available and Considered in Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(I) of Rule 17g-7

- JCR holds its basic policies for securing the quality of information as a base of due diligence for the determination of credit ratings. The information used as a base for the determination of credit rating herewith presented satisfies such policies, which include the audit by an independent auditor, the warranty made by the issuer, the publication by the issuer, some independent media or, otherwise, JCR analyst's scrutiny, etc.
- JCR sees no particular weakness in the quality of information used for the determination of the credit rating herewith presented as compared to the information used in other cases of the credit rating for comparable issuers or ratable objects.
- If the credit rating is an Indication, please see the report for Indication.

## 10 Information Relating to Conflicts of Interest as Required by Paragraph (a)(1)(ii)(J) of Rule 17g-7

- JCR receives payment of compensation for the determination of the credit rating herewith presented from either one of those parties who are issuer, underwriter, depositor or sponsor.
- JCR received in the last fiscal year in the past payment of compensation from the same party for any kind of JCR's service other than the determination of public or private credit rating, such as one in the ancillary business.

## 11 Explanation or Measure of the Potential Volatility of the Credit Rating as Required by Paragraph (a)(1)(ii)(K) of Rule 17g-7

### A) Business Bases

The credit rating is subject to alteration if there is improvement or deterioration of the issuer's business bases, since its revenue, etc. may improve or deteriorate by the change in its business management policies, clients' preferences, competitive situation, or a technological innovation. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the business bases is large.

### B) Financial Grounds and Asset Quality

The credit rating is subject to alteration if the issuer increases/ decreases its debt/ capital or vice versa and thereby makes its individual debt payment liability less or more bearable and its loss absorption capacity into the future decreased or increased. Also, the changes in the quality of asset under the issuer's holding may affect the credit rating, since such changes could raise or lower the likelihood of future loss of the issuer's financial grounds. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the financial grounds and/ or asset quality is large.

### C) Liquidity Positions

The credit rating is subject to alteration if there is a change in the issuer's financial management policy or in the relations with fund procurement sources and the change thereby makes its liquidity positions improve or deteriorate. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is large.

**D) Related Parties' Status and Stance of Support/ Assistance for the Issuer**

The credit rating is subject to alteration if there is a change in the issuer's parent company or subsidiary, guarantor or other provider of credit enhancement, or the government of the issuer's business domicile, or other related parties' own conditions and/ or position of support/ assistance for the issuer, and the change thereby makes its business bases, financial grounds and/ or liquidity positions improve or deteriorate, and/ or making the effectiveness of guarantee and other credit enhancement improve or deteriorate. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large.

**E) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract**

The credit rating is subject to alteration if there is a change in the rated debt's status in the order of seniority relative to other debts caused by the improvement/ deterioration of the issuer's financial condition. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large. Also, in case of the financial products for which non-payment of interest/ principal is contractually permissible, the credit rating is subject to alteration if and when the likelihood of such non-payment is projected to increase or decrease. The resultant alteration of the credit rating could be by a notch but often as much as a few notches.

**F) Rise and Fall in General Economy and Markets**

The credit rating is subject to alteration if there is a rise/ fall in the general economy and/ or the markets inducing the issuer's revenues/ expenses to increase/ decrease and vice versa, etc. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is exceptionally large.

**G) Various Events**

The credit rating is subject to alteration on occurrence of various events, such as change in the issuer's major shareholders, M&A and other organizational change, accident, violation of the law, litigation, legal/ regulatory change, natural disaster, etc., which are unforeseeable at the time when the credit rating is determined, causing a significant change on the issuer's business bases, financial grounds, etc. The resultant alteration of the credit rating could be by a notch but more often than not as much as a few notches.

**12**

Information on the Content of the Credit Rating, Including the Historical Performance of the Credit Rating and the Expected Probability of Default and the Expected Loss in the Event of Default as Required by Paragraph (a)(1)(ii)(L) of Rule 17g-7

- Historical records of the credit rating herewith presented are posted in the end of this paper.
- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- Facts of the probability of default are posted as Form NRSRO Exhibit 1 on the JCR website under the URL:

<https://www.jcr.co.jp/en/service/company/regu/nrsro/>

**13**

Information on the Sensitivity of the Credit Rating to Assumptions Made as Required by Paragraph (a)(1)(ii)(M) of Rule 17g-7

**A) Business Bases**

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's business bases and powers of earning or cash flow generation, etc. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's business bases on some drastic change in the operational environments, etc.

**B) Financial Grounds and Asset Quality**

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's financial grounds and asset

quality. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's financial grounds and/ or asset quality on some drastic change in its business bases.

C) Liquidity Risks

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's liquidity positions. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's liquidity positions on some drastic change in its financial management policy or relations with fund procurement sources, etc.

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's parent company or subsidiaries, guarantor or other providers of credit enhancement, the government of the issuer's business domicile or other related parties' status and stance of support/ assistance for the issuer. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if there is a major change on the part of related parties, such as replacement, disappearance, some drastic improvement/ deterioration of financial grounds/ balances, etc.

E) Rise and Fall in General Economy and Markets

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the prospects of general economy and markets. JCR expects the change should be most likely by a notch but could be as much as a few notches, should the economy or the markets change so greatly.

14

Information on the Representations, Warranties, and Enforcement Mechanisms of an Asset-backed Security as Required by Paragraph (a)(1)(ii)(N) of rule 17g-7

- The credit rating herewith presented is not for an ABS product, and hence no relevant issue.

## Attestation Required by Paragraph (a)(1)(iii) of Rule 17g-7

I, Shozo Matsumura, have responsibility to this Rating Action and to the best of my knowledge:

- A) No part of the credit rating was influenced by any other business activities.
- B) The credit rating was based solely upon the merits of the obligor, security, or money market instrument being rated.
- C) The credit rating was an independent evaluation of the credit risk of the obligor, security, or money market instrument.

松村省三

Shozo Matsumura

General Manager of Financial Institution Rating Department
