

Japan Credit Rating Agency, Ltd. (JCR) announces the following credit rating.

Shinhan Bank (security code: -)

<Affirmation>

Foreign Currency Long-term Issuer Rating: AA-
Outlook: Stable
Bonds: AA-

Rationale

- (1) Shinhan Bank is the core commercial bank of Shinhan Financial Group (SFG), one of the largest comprehensive financial groups in Korea. Other than banking, SFG is also engaged in a wide range of non-banking businesses including credit card, securities, life insurance and asset management, but Shinhan Bank accounts for around 60-70% of the group's consolidated net income. The ratings on Shinhan Bank reflect its solid business base in Korea, stable generation of profits backed by its strong risk management and comfortable levels of capital adequacy ratios. The Korean economy is projected to turn into a slight negative growth in 2020 due to the impact of the COVID-19 pandemic. The deteriorating business environment has been putting pressure on Korean banks' earnings. Even in such situation, however, Shinhan Bank continued to post a solid financial performance in the first half of 2020 by absorbing increased credit costs. It needs to be monitored how the pandemic will affect the bank's asset quality and earnings. Nevertheless, JCR holds that Shinhan Bank's current level of earnings capacity and capital buffers are adequate enough to absorb temporary increases in credit costs. Based on these, JCR has affirmed the ratings with a Stable outlook.
- (2) Shinhan Bank is positioned as one of Korea's four largest banks. SFG as a whole which has Shinhan Card, the country's largest credit card company, under its wing boasts a high market presence both in banking and non-banking operations. Shinhan Bank's market shares stood at 12% for loans (as of the end of 2019) and 15% for deposits (as of the end of June 2019). Its solid franchise both in retail and corporate banking has enabled it to secure a consistent growth of deposits and loans in the competitive market. Among major Korean banks, Shinhan stands out for its stable management as its prudent operations have enabled it to deliver a steady performance throughout economic cycles. Faced with the prolonged low interest rate environment, the bank has been focusing on profitability and soundness in recent years. For its lending business, it has been targeting a selective growth with a focus on unsecured loans for individuals and the SOHO/SME segment. Of note is the growth of individual loans taken out for paying deposits under a real estate leasing contract ("Jeonse"). In Korea, the government's measures to rein in the overheating of the real estate market have resulted in reducing demand for home purchase while increasing demand for rent. This seems to be helping Shinhan Bank grab demand for real estate-related loans. Following the outbreak of the COVID-19 pandemic, loans to SMEs under the government guarantee program have also been increasing in volume.
- (3) Shinhan Bank's asset quality continued to improve under its strict risk control and the country's generally accommodative monetary environment. Its substandard-and-below NPL ratio has been at a historically low 0.4% level since 2018. As of the end of June 2020, it further declined as compared to December 2019 to reach 0.43%. Its credit cost ratio was also contained within the 10bps range in 2018 and 2019. Shinhan Bank has track records of prudent credit risk management, and has managed to limit loans to the sectors sensitive to economic cycles. Notably, the bank has significantly reduced over the past years its loans to the shipbuilding, shipping and construction sectors and real estate project financing, whose credit risks had increased after the global financial crisis. JCR views that these approaches have made the bank's asset quality more resilient to deterioration of economic conditions. As for home financing loans that have been increasing in recent years, they are generally diversified into a number of small loans and duly secured mainly by guarantees. Going forward, there are uncertainties partly because some loans may become non-performing after the end of the government support measures. However, JCR holds that possible impacts on the bank's credit costs will be manageable given the amount of loans with payment moratorium and coverage by collaterals. Moreover, the bank's loans to the sectors particularly hard hit by the pandemic, such as restaurants and accommodations, account for a small proportion of its total loans. Its average loan amount per borrower is also small.

- (4) Shinhan Bank's financial performance has been solid in recent years, supported by an increase of its total operating income and contained operating costs and loan loss provisioning. In 2019, its operating income before provisioning increased 6% from the previous year while its pre-tax income stayed almost flat at the 3 trillion won level. There has been continuing pressure on net interest margin under the prolonged low interest rate environment, but the bank has been retaining the growth of its total operating income by expanding net interest income through increased lending. The bank's ROA based on pre-provisioning operating income stood at around 1% in 2019, providing adequate buffer to absorb credit cost. Its efforts such as containment of operating costs and enhancement of low-cost deposits have contributed to preserving its core earnings capacity. In the first half of 2020, the bank's pre-tax income suffered a moderate 9% year-on-year decline as higher loan-loss provisions necessitated mainly by a weaker economic outlook were partly offset by an increased net interest income. SFG's profitability also stayed solid with its consolidated operating income before provisioning and pre-tax income growing for five years running to 2019. In 2019, its banking arm and Orange Life, which it acquired in 2019, contributed to better earnings, although its credit card subsidiary, the biggest earner among the non-banking arms, saw its income decline for two consecutive years due partly to the cut of merchant fees and its investment banking subsidiary also performed poorly.
- (5) SFG's consolidated common equity Tier 1 ratio stood at 11.4% (12.5% for Shinhan Bank) at the end of June 2020, staying virtually flat from the end of 2019. The ratio is comfortable for the AA range rating. JCR holds that its sound capital adequacy will be maintained supported by a steady profit accumulation. Shinhan Bank retains its stable liquidity position. Its won-denominated loan-to-deposit ratio has been hovering at slightly lower than 100% while its Basel III-based liquidity coverage ratio and net stable funding ratio stay at sound levels. As for foreign currency funding, the bank's reliance on wholesale funding has lowered as compared with past years.

INFORMATION DISCLOSURE FORM

Japan Credit Rating Agency, Ltd.

Disclosure Required by Paragraph (a)(1)(ii) of Rule 17g-7

Issuer:	Shinhan Bank
Rating Publication Date:	August 28, 2020

1

The Symbol, Number, or Score in the Rating Scale used to Denote Credit Rating Categories and Notches and, the Identity of the Obligor or the Identity and a Description of the Security or Money Market Instrument as Required by Paragraph (a)(1)(ii)(A) of Rule 17g-7

- Please see the news release.

2

The version of the procedure or methodology used to determine the credit rating; as Required by Paragraph (a)(1)(ii)(B) of Rule 17g-7

- Please see the news release.

3

The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7

- The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and business environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees.
- The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.

A) Business Bases

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

B) Financial Grounds and Asset Quality

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

C) Liquidity Positions

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The likelihood of debt payment is affected one way or the other by the issuer's related parties such as parent company, subsidiary, guarantor, and the government of the issuer's business domicile, etc. - by their own conditions and/ or position of support/ assistance for the issuer.

E) Order of Seniority in Debt Payment

The likelihood of debt payment can be different between given debts of the same issuer. The likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment which is determined by design as financial product or by laws, etc.

4 The Potential Limitations of the Credit Rating as Required by Paragraph (a)(1)(ii)(D) of Rule 17g-7

- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- The objective of the credit rating herewith presented does not include any concerns other than the likelihood of debt payment, such as risks of price changes, market liquidity, etc.
- The credit rating herewith presented is necessary to be reviewed along with possible changes of the issuer of rated objects in its business performance and/ or circumstances which include regulatory environment, and hence subject to possible alteration.

5 Information on the Uncertainty of the Credit Rating as Required by Paragraph (a)(1)(ii)(E) of Rule 17g-7

- The information used for the determination of credit rating as herewith presented is obtained by JCR from the issuer of rated objects and other sources that JCR trusts in terms of accuracy and reliability but possibly contains errors due to human, non-human or other causes. Consequently, the credit rating determined on the grounds of such information does not constitute, explicitly or implicitly, any representation or warrant of JCR on the information itself or any consequences of its use in terms of accuracy, relevance, timeliness, wholeness, market value, or usefulness for any specific purposes.

6 Use of Due Diligence Services of a Third Party in Taking the Rating Action as Required by Paragraph (a)(1)(ii)(F) of Rule 17g-7

- There is no use of any third-party due diligence service in the determination of the credit rating herewith presented.

7 Use of Servicer or Remittance Reports to Conduct Surveillance of the Credit Rating Required by Paragraph (a)(1)(ii)(G) of Rule 17g-7

- There is no use of any servicer or remittance report to conduct surveillance of the credit rating herewith presented.

8 The Types of Data Relied Upon for the Purpose of Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(H) of Rule 17g-7

- The information posted in the below, which includes data, is used for the determination of the credit rating herewith presented.

- A) Audited financial statements presented by the rating stakeholders
- B) Explanations of business performance, management plans, etc. presented by the rating stakeholders

9 Overall assessment of the Quality of Information Available and Considered in Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(I) of Rule 17g-7

- JCR holds its basic policies for securing the quality of information as a base of due diligence for the determination of credit ratings. The information used as a base for the determination of credit rating herewith presented satisfies such policies, which include the audit by an independent auditor, the publication by the issuer or some independent media or, otherwise, JCR analyst's scrutiny, etc.
- JCR sees no particular weakness in the quality of information used for the determination of the credit rating herewith presented as compared to the information used in other cases of the credit rating for comparable issuers or ratable objects.

10 Information Relating to Conflicts of Interest as Required by Paragraph (a)(1)(ii)(J) of Rule 17g-7

- JCR receives payment of compensation for the determination of the credit rating herewith presented from either one of those parties who are issuer, underwriter, depositor or sponsor.
- JCR did not receive in the last fiscal year in the past payment of compensation from the same party for any kind of JCR's service other than the determination of credit rating, such as one in the ancillary business.

11 Explanation or Measure of the Potential Volatility of the Credit Rating as Required by Paragraph (a)(1)(ii)(K) of Rule 17g-7

A) Business Bases

The credit rating is subject to alteration if there is improvement or deterioration of the issuer's business bases, since its revenue, etc. may improve or deteriorate by the change in its business management policies, clients' preferences, competitive situation, or a technological innovation. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the business bases is large.

B) Financial Grounds and Asset Quality

The credit rating is subject to alteration if the issuer increases/ decreases its debt/ capital or vice versa and thereby makes its individual debt payment liability less or more bearable and its loss absorption capacity into the future decreased or increased. Also, the changes in the quality of asset under the issuer's holding may affect the credit rating, since such changes could raise or lower the likelihood of future loss of the issuer's financial grounds. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the financial grounds and/ or asset quality is large.

C) Liquidity Positions

The credit rating is subject to alteration if there is a change in the issuer's financial management policy or in the relations with fund procurement sources and the change thereby makes its liquidity positions improve or deteriorate. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is large.

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The credit rating is subject to alteration if there is a change in the issuer's parent company or subsidiary, guarantor or other provider of credit enhancement, or the government of the issuer's

business domicile, or other related parties' own conditions and/ or position of support/ assistance for the issuer, and the change thereby makes its business bases, financial grounds and/ or liquidity positions improve or deteriorate, and/ or making the effectiveness of guarantee and other credit enhancement improve or deteriorate. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large.

E) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

The credit rating is subject to alteration if there is a change in the rated debt's status in the order of seniority relative to other debts caused by the improvement/ deterioration of the issuer's financial condition. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large. Also, in case of the financial products for which non-payment of interest/ principal is contractually permissible, the credit rating is subject to alteration if and when the likelihood of such non-payment is projected to increase or decrease. The resultant alteration of the credit rating could be by a notch but often as much as a few notches.

F) Rise and Fall in General Economy and Markets

The credit rating is subject to alteration if there is a rise/ fall in the general economy and/ or the markets inducing the issuer's revenues/ expenses to increase/ decrease and vice versa, etc. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is exceptionally large.

G) Various Events

The credit rating is subject to alteration on occurrence of various events, such as change in the issuer's major shareholders, M&A and other organizational change, accident, violation of the law, litigation, legal/ regulatory change, natural disaster, etc., which are unforeseeable at the time when the credit rating is determined, causing a significant change on the issuer's business bases, financial grounds, etc. The resultant alteration of the credit rating could be by a notch but more often than not as much as a few notches.

12

Information on the Content of the Credit Rating, Including the Historical Performance of the Credit Rating and the Expected Probability of Default and the Expected Loss in the Event of Default as Required by Paragraph (a)(1)(ii)(L) of Rule 17g-7

- Historical records of the credit rating herewith presented are posted in the end of this paper.
- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- Facts of the probability of default are posted as Form NRSRO Exhibit 1 on the JCR website under the URL:

<https://www.jcr.co.jp/en/service/company/regu/nrsro/>

13

Information on the Sensitivity of the Credit Rating to Assumptions Made as Required by Paragraph (a)(1)(ii)(M) of Rule 17g-7

A) Business Bases

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's business bases and powers of earning or cash flow generation, etc. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's business bases on some drastic change in the operational environments, etc.

B) Financial Grounds and Asset Quality

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's financial grounds and asset quality. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's financial grounds and/ or asset quality on some drastic change in its business bases.

C) Liquidity Risks

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's liquidity positions. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's liquidity positions on some drastic change in its financial management policy or relations with fund procurement sources, etc.

D) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the order of seniority in repayment of interests and principal. JCR assumes the resultant change of the credit rating is most likely by a notch. The change could be as much as a few notches if the issuer's financial structure differs so much and thereby the balance between debts shifted so greatly. Rating change is also possible in case of the financial products for which non-payment of interest/ principal is contractually permissible, if and when the assumptions made at the time of its determination turns out to be inaccurate. The change of the credit rating is assumed to be by a notch but often as much as a few notches.

E) Rise and Fall in General Economy and Markets

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the prospects of general economy and markets. JCR expects the change should be most likely by a notch but could be as much as a few notches, should the economy or the markets change so greatly.

14

Information on the Representations, Warranties, and Enforcement Mechanisms of an Asset-backed Security as Required by Paragraph (a)(1)(ii)(N) of rule 17g-7

- The credit rating herewith presented is not for an ABS product, and hence no relevant issue.

I, Toshihiko Naito, have responsibility to this Rating Action and to the best of my knowledge:

- A) No part of the credit rating was influenced by any other business activities.
- B) The credit rating was based solely upon the merits of the obligor, security, or money market instrument being rated.
- C) The credit rating was an independent evaluation of the credit risk of the obligor, security, or money market instrument.
