Mitsubishi HC Capital Inc. (security code: 8593)

Mitsubishi HC Finance America LLC (security code: -)

<Affirmation>

EMTN Program: AA

Rationale

- (1) Mitsubishi HC Capital Inc. ("MHC") is a major general leasing company and an equity method affiliate of Mitsubishi UFJ Financial Group, Inc. ("MUFG") and Mitsubishi Corporation. It also cooperates with Hitachi, Ltd. as an important financial partner. MHC's long-term issuer rating reflects its extremely strong market position and competitiveness in the leasing industry, good earnings power and capital adequacy, sound asset quality, and strong liquidity. In addition, based on MUFG's degree of control and involvement and MHC's managerial importance to MUFG Group, JCR assesses MHC's longterm issuer rating floor at one notch below the "AA," which is equivalent to MUFG's group creditworthiness.
- (2) MHC's market position and competitiveness in the leasing industry are extremely high. It has a diverse background in banking, trading, and manufacturing sectors, and has built a strong customer base both in Japan and abroad. MHC has a wide range of business segments: Customer Solutions and Global Business, which are a stable source of earnings through leveraging the customer base, and Aviation, Logistics (marine container and railway freight car leasing), Real Estate, Environment & Energy, and Mobility for specialized business areas. Each segment has a high competitive advantage, and its business portfolio is well diversified due to the wide range of business areas and regions in which it operates.
- (3) The earnings power is good. MHC has the diversified earnings sources, which limits the volatility of earnings due to changes in the external environment. Its profit size is among the highest in the industry, and the profitability is high in terms of ROA and other indicators. In addition to stable earnings sources, MHC will be able to continue to secure a high level of profit in the future, supported by Aviation, where passenger demand has recovered from the impact of COVID-19, and Logistics, where marine container leasing is strong. Under the medium-term management plan that began in the fiscal year ending March 2024, MHC is working to improve the efficiency of existing businesses, makes efforts for high added value, and develop new businesses, and JCR will pay attention to whether it can further increase its earnings power.
- (4) The quality of assets is sound. MHC's credit management policy is sound, and its self-assessment and allowance standards are rigorous. Bad debt related expenses and impairment losses in past years have been well within the range that can be absorbed by periodic profit. By segment, for Aviation, risks are receding as MHC maintains a high-quality aircraft portfolio and market conditions are improving. On the other hand, Real Estate has been affected by the deteriorating office building market in the US in the overseas finance business. However, the outstanding balance in this area is not so large, and additional losses are expected to be limited.
- (5) Capital adequacy is good. MHC is steadily accumulating retained earnings and is controlling the growth of risk assets through the sale of assets. The JCR-adjusted equity ratio, which takes into account hybrid securities and other factors, is high and has been improving. MHC secures sufficient

- capital in light of the amount of risk under its highly developed risk management system. There are no particular concerns about liquidity. MHC has a diverse range of financing sources, centered on its main bank, MUFG Bank, Ltd., and its financing in both yen and foreign currencies is stable. ALM is managed conservatively, and interest rate risk and liquidity risk are appropriately controlled.
- (6) Based on the evaluation of the degree of control and involvement by MUFG and the degree of managerial importance of MHC to the MUFG Group, JCR takes into account the probability of support by the Group in the long-term issuer rating of MHC. JCR assesses that the degree of control and involvement by MUFG is reasonably strong. MUFG holds approximately 20% of the voting rights, and several directors, including the president, are from MUFG Bank. They have a close relationship in risk management, financing, and other areas. JCR also evaluates that MHC has a high degree of managerial importance in the MUFG Group, and as a strategically important partner of MUFG, MHC is engaged in leasing and business operations and plays a complementary role of the Group's financial services function, and is strategically and functionally important in the MUFG Group.

The assumptions for the credit ratings and the definitions of the rating symbols are published as "Types of Credit Ratings and Definitions of Rating Symbols" (January 6, 2014) in Information about JCR Ratings on JCR's website (https://www.jcr.co.jp/en/).

Outline of the rating methodology is shown as "JCR's Rating Methodology" (November 7, 2014), "Leasing" (July 1, 2013), "Rating Methodology for Financial Groups' Holding Companies and Group Companies" (September 1, 2022) and "Ratings of Hybrid Securities" (September 10, 2012) in Information about JCR Ratings on JCR's website (https://www.jcr.co.jp/en/).

The rating stakeholder participated in the rating process of the aforementioned credit ratings.

A preliminary rating is a credit rating assigned as a preliminary evaluation while material terms for issue to be rated are not yet finalized. When the issuing terms are finalized, JCR will confirm them and will assign a credit rating anew. The rating level of the final rating may be different from that of the preliminary rating, depending on the final content of the terms, etc.

A program rating is assigned to evaluate the creditworthiness of a program. The credit standing of an individual note issued under the program may be regarded as the same as that of the rated program. However, JCR does not consider the credit standing of the individual note as the same as that of the program, in the cases where the principal and interest payments of the individual note rely on the credit standing of a third party rather than the issuer of the program and notes (e.g. credit linked notes and exchangeable notes). JCR usually does not assign a rating to the individual note issued under the program, unless the issuer solicits a rating.

- The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7
 - The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and business environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees.
 - The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.

A) Business Bases

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

B) Financial Grounds and Asset Quality

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

C) Liquidity Positions

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The likelihood of debt payment is affected one way or the other by the issuer's related parties such as parent company, subsidiary, guarantor, and the government of the issuer's business domicile, etc. - by their own conditions and/ or position of support/ assistance for the issuer.

E) Order of Seniority in Debt Payment

The likelihood of debt payment can be different between given debts of the same issuer. The likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment which is determined by design as financial product or by laws, etc.

The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large.

Also, in case of the financial products for which non-payment of interest/ principal is contractually permissible, the credit rating is subject to alteration if and when the likelihood of such non-payment is projected to increase or decrease.
