

Japan Credit Rating Agency, Ltd. (JCR) announces the following credit rating.

JCR's Rating Review of 4 Expressway Companies

Issuer	Code	Long-Term Issuer Rating		Outlook
Central Nippon Expressway Company Limited	-	<Affirmation>	AAA	Stable
East Nippon Expressway Company Limited	-	<Affirmation>	AAA	Stable
West Nippon Expressway Company Limited	-	<Affirmation>	AAA	Stable
Metropolitan Expressway Company Limited	-	<Affirmation>	AAA	Stable

(See page 5 and beyond for details about ratings on individual bonds, etc.)

Rating Viewpoints

- (1) The 4 expressway companies (the “companies”) are special companies that were established in October 2005 when the 4 highway-related public corporations were split up and privatized. Based on agreements signed between the companies and Japan Expressway Holding and Debt Repayment Agency (“JEHDRA”), they are engaged in expressway business, which is expressways construction as well as their operation/ management, as their core business, and expressway-related businesses such as SA/ PA business, which is the operation and management of service areas and parking areas. Their ratings are supported by several factors including the fact that they, having strong relationships with the Japanese government under the laws and regulations, are engaged in a business that is very essential for national policy as well as a business scheme that guarantees certainty of debt repayment. The Japanese government actively uses fiscal investment and loan program for the expressway business to increase stability and ease of use of expressways. It was decided that the government would directly provide fiscal loans to Central Nippon Expressway Company Limited, East Nippon Expressway Company Limited and West Nippon Expressway Company Limited (the “3 NEXCOs”), which JCR thinks indicates the government’s clear stance on supporting the road policy.
- (2) Their expressway business is under a business scheme that separates operations from infrastructure, which guarantees that the expressways are efficiently constructed/ managed and debts are surely repaid. The companies construct expressways, and those assets after the completion in principle belong to JEHDRA, which assumes the bonds and debts they issued/ borrowed for the construction (concurrent (concomitant) assumption). The companies lease the expressway assets from JEHDRA, which then uses the lease fees to repay the debts. After the expressway tolls collection period expires, namely after the debts are fully repaid, the expressway assets will be vested in the Japanese government and local public bodies, which are the expressway administrators. This structure shows that the companies act on behalf of the Japanese government and local public bodies for infrastructure development.
- (3) JCR highly values that there are structures that prevent business risk due to changes in demand in the expressway business from coming to the surface. The maximum amount of debts that are transferred to JEHDRA from the companies, amount of expressway tolls that the companies collect (estimated toll revenue), amount of their maintenance and management costs (estimated administration costs), amount of the lease fees that the companies pays to JEHDRA, and so on are specified in the agreements between JEHDRA and the companies so that the debts in relation to the expressway business are to be repaid by September 30, 2065 when the expressway tolls collection period expires by statute. In cases where the actual toll revenue fluctuates by more than 1% from the estimated toll revenue, the companies are allowed to limit the effects on the profits to a certain extent by changing the lease fees for the expressway assets. If the companies are not unable to pay the lease fees for the expressway assets due to occurrences of large-scale

disasters, etc., they can also extend the due date. In cases where the estimated toll revenue/ estimated administration costs need to be revised due to changes to the external environments, the agreements can be modified, in order not to cause any impact on the companies' operations. Due to the COVID-19 pandemic impact, their toll revenues for the fiscal year ending March 2021 (FY2020) may fall below the current estimated toll revenue under the agreements, but JCR sees that these structures will support their operations.

- (4) In recent road policy, increasing safety and ease of use of expressway has been placed as an important policy issue. Based on the government's Basic Plan on Security /Safety on Expressways released in September 2019, the companies formulated their implementation plans and have been working on various measures to improve safety and ease of use of expressways. Over the past few years, the 3 NEXCOs have added many projects such as those for acceleration of construction works of ring roads in metropolitan areas, measures for strengthening bridges against earthquakes and converting of temporary two-lane sections into four-lane roads. As the increasing costs due to these additional projects can be covered by reduction of burden of interest payments through leveraging fiscal loans for JEHDRA, however, the impact on the debt repayment plans for the expressway business is limited.
- (5) As any profit shall not be included in the expressway tolls in the expressway business and the companies' estimated toll revenues are set to equal total of estimated administration costs and the lease fees that the companies pays to JEHDRA, revenue and expenditure of this business are basically structured to balance each other. However, in cases where actual maintenance and management costs are above the estimated administration cost or expressways are constructed using their own retained earnings, they may fall into an operating loss. Meanwhile, all companies ensure a certain profit of the expressway-related businesses, which becomes a buffer for fluctuations of profits from expressway business. However, the number of vehicles passing the expressways has significantly dropped since March 2020 due to effects from self-restraint of going out following the COVID-19 pandemic. Their operating income may become a loss for FY2020, if the declines of toll revenue and the number of users for SA/ PA continue. In the expressway business, however, risk of recording of large amount of losses is well controlled thanks to the business structure. In addition, in light of their capital amounts, JCR sees it is less likely that their financial bases will be significantly impaired.
- (6) Having no rival, the SA/ PA business, core of the expressway-related businesses, enjoys in effect monopolistic conditions. The companies basically cover their capital expenditures by cash flows from the expressway-related businesses, taking conservative stance on expansion of the expressway-related businesses. The cross default clause attached to the companies' bonds applies to debts of the expressway-related businesses. As such, the companies, which place top priority on assurance of debt repayment for the expressways, are unlikely to aggressively engage themselves in businesses with high risks, which require a large amount of external funds. If their earnings significantly drop along with the COVID-19 pandemic, they may be required to raise working capital in the expressway-related businesses. As such external funds to be raised in the expressway-related businesses are not subject to debt assumption by JEHDRA, it will be necessary for each company to repay such funds by itself. Given this, JCR will closely watch the trend of the expressway-related businesses.

Rationale

Issuer: Central Nippon Expressway Company Limited

<Affirmation>

Long-term Issuer Rating:	AAA
Outlook:	Stable
Bonds:	AAA

- (1) Central Nippon Expressway Company Limited (the "Company") is a special company that is wholly owned by the Japanese government with a business area of relatively heavy traffic volume from Tokyo metropolitan area to Chubu and Kinki regions. It constructs, operates and manages major expressways linking Tokyo to Nagoya and Osaka including Tomei, Chuo and Shin Tomei Expressways. As of March 31, 2020, its expressway network in operation reached 2,151 km and its expressway under construction reached 113 km, the longest among the expressway companies. In and after FY2018, projects of conversions of provisional two-lane sections of Tokai Hokuriku Expressway and others into four-lane sections were added as additional projects using fiscal loans

to JEHDRA to the conversion of the long 145 km section from Gotenba JCT to Hamamatsu-Inasa JCT of Shin Tomei Expressway into six-lane section, increasing the ratio of reconstruction project.

- (2) The number of vehicles passing the expressways has been increasing thanks partly to the opening of the Shin Tomei Expressway. Although the number in March significantly dropped due to effects from self-restraint of going out following the COVID-19 pandemic, the toll revenue and SA/ PA sales for FY2019 were almost on a par with those figures for FY2018, dropped 0.5% year-on-year to 689.7 billion yen and 2.6% year-on-year to 208.1 billion yen, respectively. The Company has a sufficient risk buffer with the consolidated net assets reaching above 260 billion yen as of September 30, 2019.
- (3) Its capital expenditures with respect to the expressway-related businesses are mainly for the SA / PA business. With start of service of the Shin Tomei Expressway, the Company took out loans from private financial institutions for construction of new SAs, but it has not externally raised funds except that time. The capital investments will be mainly those for replacement investments for the existing SAs/ PAs for the time being, and the Company plans to cover these expenditures by cash flows from the expressway-related businesses. There are no large-scale capital investment plans that require externally raising funds, and it is less likely that it will take excess risks in the expressway-related businesses. Meanwhile, it is necessary to closely monitor the COVID-19 pandemic impact on the earnings.

Issuer: East Nippon Expressway Company Limited

<Affirmation>

Long-term Issuer Rating:	AAA
Outlook:	Stable
Bonds:	AAA

- (1) East Nippon Expressway Company Limited (the "Company") is a special company that is wholly owned by the Japanese government with a wide business area from Kanto including Niigata Prefecture and a part of Nagano Prefecture northward to Hokkaido. It constructs, operates and manages expressways including Tohoku, Kan-Etsu and Joban Expressways. As of March 31, 2020, its expressway network in operation reached 3,943 km, the longest among the expressway companies. All of its expressway under construction reaching 85 km is joint project with the Japanese government (through a method of merging public works and toll-road projects), and construction of Tokyo Outer Ring and Metropolitan Inter-City Expressway accounts for 50% of the total. Projects of conversions of provisional two-lane sections of Metropolitan Inter-City Expressway (section from Kuki Shiraoka JCT to Taiei JCT for 92 km) and others into four-lane sections were added as additional projects using fiscal loans to JEHDRA, increasing the ratio of reconstruction project.
- (2) The number of vehicles passing the expressways has been increasing thanks partly to the sequential openings of the Metropolitan Inter-City Expressway and opening of Tokyo Outer Ring. Although the number in March significantly dropped due to effects from self-restraint of going out following the COVID-19 pandemic, the toll revenue and SA/ PA sales for FY2019 were almost on a par with those figures for FY2018, dropped 0.3% year-on-year to 857.4 billion yen and 0.4% year-on-year to 156.4 billion yen, respectively. The Company has a sufficient risk buffer with the consolidated net assets reaching above 250 billion yen as of September 30, 2019.
- (3) Its capital expenditures with respect to the expressway-related businesses are mainly for the SA / PA business. It operates unique retail facilities such as theme park-type parking areas and full-fledged retail facilities (Pasar) for the purpose of improving its services in the SA/ PA business. It has been covering all of these capital expenditures by cash flows from the expressway-related businesses. The capital investments will be mainly those for replacement investments for the existing SAs/ PAs for the time being. There are no large-scale capital investment plans that require externally raising funds, and it is less likely that it will take excess risks in the expressway-related businesses. Meanwhile, it is necessary to closely monitor the COVID-19 pandemic impact on the earnings.

Issuer: West Nippon Expressway Company Limited

<Affirmation>

Long-term Issuer Rating:	AAA
Outlook:	Stable
Bonds:	AAA

- (1) West Nippon Expressway Company Limited (the "Company") is a special company that is wholly owned by the Japanese government with a wide business area from Kinki region to Chugoku, Shikoku, Kyushu and Okinawa. It constructs, operates and manages expressways including Meishin, Chugoku and Kyushu Expressways. As of March 31, 2020, its expressway network in operation reached 3,534 km. Its expressway under construction reaches 71 km, of which 50% is related to the Shin-Meishin Expressway. In order to realize seamless integrated fee including integration of management bodies, a section for 7 km of Route 8 Kyoto Line managed by Hanshin Expressway Company Limited and a section for 13 km of Daini Hanna Toll Road managed by Osaka Prefectural Road Public Corporation and Nara Prefectural Road Public Corporation were transferred to the Company in April 2019. Transfer of section from Amanohashidate IC to Tanba IC of Kyoto-Jukan Expressway managed by Kyoto Prefectural Road Public Corporation is scheduled for April 2023. Projects of conversions of provisional two-lane sections of expressways and ordinary toll roads into four-lane sections were added as additional projects using fiscal loans to JEHDRA to the conversion of Shin-Meishin Expressway into six-lane road, increasing the ratio of reconstruction project. It is statutory defined that the Company and Honshu-Shikoku Bridge Expressway Company Limited ("HSBE") will merge in the future, provided that HSBE stabilizes its management. Even if it is merged, the impact on its creditworthiness will be limited in light of the HSBE's small size of expressway-related businesses.
- (2) The number of vehicles passing the expressways has been increasing thanks partly to the openings of Higashi-Kyushu Expressway and Shin-Meishin Expressway. Although the number in March significantly dropped due to effects from self-restraint of going out following the COVID-19 pandemic, the toll revenue and SA/ PA sales for FY2019 were almost on a par with those figures for FY2018, increased 2.0% year-on-year to 798.4 billion yen and dropped 0.8% year-on-year to 161.3 billion yen, respectively. The Company has a sufficient risk buffer with the consolidated net assets reaching above 220 billion yen as of September 30, 2019.
- (3) Its capital expenditures with respect to the expressway-related businesses are mainly for the SA / PA business. It has been covering all of these capital expenditures by cash flows from the expressway-related businesses. The capital investments will be mainly those for replacement investments for the existing SAs/ PAs for the time being. There are no large-scale capital investment plans that require externally raising funds, and it is less likely that it will take excess risks in the expressway-related businesses. Meanwhile, it is necessary to closely monitor the COVID-19 pandemic impact on the earnings.

Issuer: Metropolitan Expressway Company Limited

<Affirmation>

Long-term Issuer Rating:	AAA
Outlook:	Stable
Bonds:	AAA

- (1) Metropolitan Expressway Company Limited (the "Company") is a special company in which the Japanese government (49.99% ownership ratio), prefectural governments of Tokyo (26.72%), Kanagawa (8.28%), Saitama (5.90%), and Chiba (0.80%) and Cities of Yokohama (4.45%) and Kawasaki (3.82%) have stakes. It constructs, operates and manages the Metropolitan Expressway. As of March 31, 2020, its expressway network in operation reached 327 km. Through the opening of Yokohama Circular Northwestern Route (7.1 km) in March 2020, Tomei Expressway was directly linked to Port of Yokohama, with the route directly linked to Yokohama North Line. It is promoting construction of Shin-Omiya Ageo Road (8.0 km), while steadily working on replacement projects (large-scale replacement and repair). For the Nihonbashi section of the Metropolitan Expressway as a replacement project, it is considering underground construction. Although the estimated expenses are large reaching 320 billion yen, the Company's burden is not likely to become large.
- (2) The number of vehicles passing the expressways has been increasing thanks partly to the improvement of network of Central Circular Route and opening of Yokohama North Line. The month-by-month number of vehicles passing the expressways (daily average) remained roughly unchanged year-on-year from April 2019 to February 2020, but the number in March significantly dropped due to effects from self-restraint of going out following the COVID-19 pandemic. The Company has a sufficient risk buffer with the consolidated net assets reaching above 68 billion yen as of September 30, 2019 and the small risk from the express-way related businesses.
- (3) The parking lot operation is the expressway-related businesses' core business. This operation enjoys stable profit, reflecting the many fixed-term parking contracts, despite the small amount of

the profit. It operates 20 PAs as rest areas, but their contributions to the profit are small, because many of these PAs are small in size. The Company has been increasing its capital expenditures for expansion of pay-by-the-hour parking lots and real estate leasing business using its own real estate property in addition to the repairs of PA shops and other replacement investments, but has been covering these capital expenditures by its cash flows from the expressway-related businesses. There are no large-scale capital investment plans that require externally raising funds, and it is less likely that it will take excess risks in the expressway-related businesses. Meanwhile, it is necessary to closely monitor the COVID-19 pandemic impact on the earnings.

Rating Assignment Date: May 25, 2020

The criteria used for identifying matters which serve as assumptions for the assessment of the credit status, and the criteria used for setting of grades indicating the results of the assessments of the credit status are published as "Types of Credit Ratings and Definitions of Rating Symbols" (January 6, 2014) in Information about JCR Ratings on JCR's website (<https://www.jcr.co.jp/en/>).

Outline of methodology for determination of the credit rating is shown as "FILP Agencies, etc." (March 13, 2014) in Information about JCR Ratings on JCR's website (<https://www.jcr.co.jp/en/>).

Japan Credit Rating Agency, Ltd.

Jiji Press Building, 5-15-8 Ginza, Chuo-ku, Tokyo 104-0061, Japan
Tel. +81 3 3544 7013, Fax. +81 3 3544 7026

Information herein has been obtained by JCR from the issuers and other sources believed to be accurate and reliable. However, because of the possibility of human or mechanical error as well as other factors, JCR makes no representation or warranty, express or implied, as to accuracy, results, adequacy, timeliness, completeness or merchantability, or fitness for any particular purpose, with respect to any such information, and is not responsible for any errors or omissions, or for results obtained from the use of such information. Under no circumstances will JCR be liable for any special, indirect, incidental or consequential damages of any kind caused by the use of any such information, including but not limited to, lost opportunity or lost money, whether in contract, tort, strict liability or otherwise, and whether such damages are foreseeable or unforeseeable. JCR's ratings and credit assessments are statements of JCR's current and comprehensive opinion regarding redemption possibility, etc. of financial obligations assumed by the issuers or financial products, and not statements of opinion regarding any risk other than credit risk, such as market liquidity risk or price fluctuation risk. JCR's ratings and credit assessments are statements of opinion, and not statements of fact as to credit risk decisions or recommendations regarding decisions to purchase, sell or hold any securities such as individual bonds or commercial paper. The ratings and credit assessments may be changed, suspended or withdrawn as a result of changes in or unavailability of information as well as other factors. JCR receives a rating fee paid by issuers for conducting rating services in principle. JCR retains all rights pertaining to this document, including JCR's rating data. Any reproduction, adaptation, alteration, etc. of this document, including such rating data, is prohibited, whether or not wholly or partly, without prior consent of JCR.

JCR is registered as a "Nationally Recognized Statistical Rating Organization" with the U.S. Securities and Exchange Commission with respect to the following four classes. (1) Financial institutions, brokers and dealers, (2) Insurance Companies, (3) Corporate Issuers, (4) Issuers of government securities, municipal securities and foreign government securities.

JCR publishes its press releases regarding the rating actions both in Japanese and in English on the same day. In case that it takes time to translate rating rationale, JCR may publicize the summary version, which will be replaced by the full translated version within three business days. (Regarding Structured Finance products, JCR only publicize the summary version in English.)

INFORMATION DISCLOSURE FORM

Japan Credit Rating Agency, Ltd.

Disclosure Required by Paragraph (a)(1)(ii) of Rule 17g-7

Issuer:	Central Nippon Expressway Company Limited East Nippon Expressway Company Limited West Nippon Expressway Company Limited Metropolitan Expressway Company Limited
Rating Publication Date:	May 27, 2020

1 The Symbol, Number, or Score in the Rating Scale used to Denote Credit Rating Categories and Notches and, the Identity of the Obligor or the Identity and a Description of the Security or Money Market Instrument as Required by Paragraph (a)(1)(ii)(A) of Rule 17g-7

- Please see the news release.

2 The version of the procedure or methodology used to determine the credit rating; as Required by Paragraph (a)(1)(ii)(B) of Rule 17g-7

- Please see the news release.

3 The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7

- The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and business environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees.
- The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.

A) Legal Protection and Support Provided by the Government

The likelihood of a given debt payment is highly conditional to the issuer's legal protection provided by the government, personnel and capital relationship with the government, importance in the government's policy, credit enhancement, and other forms of the government's supporting policy, framework and the strength thereof.

B) Business Bases

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

C) Financial Grounds and Asset Quality

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

D) Liquidity Positions

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

4 The Potential Limitations of the Credit Rating as Required by Paragraph (a)(1)(ii)(D) of Rule 17g-7

- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- The objective of the credit rating herewith presented does not include any concerns other than the likelihood of debt payment, such as risks of price changes, market liquidity, etc.
- The credit rating herewith presented is necessary to be reviewed along with possible changes of the issuer of rated objects in its business performance and/ or circumstances which include regulatory environment, and hence subject to possible alteration.

5 Information on the Uncertainty of the Credit Rating as Required by Paragraph (a)(1)(ii)(E) of Rule 17g-7

- The information used for the determination of credit rating as herewith presented is obtained by JCR from the issuer of rated objects and other sources that JCR trusts in terms of accuracy and reliability but possibly contains errors due to human, non-human or other causes. Consequently, the credit rating determined on the grounds of such information does not constitute, explicitly or implicitly, any representation or warrant of JCR on the information itself or any consequences of its use in terms of accuracy, relevance, timeliness, wholeness, market value, or usefulness for any specific purposes.

6 Use of Due Diligence Services of a Third Party in Taking the Rating Action as Required by Paragraph (a)(1)(ii)(F) of Rule 17g-7

- There is no use of any third-party due diligence service in the determination of the credit rating herewith presented.

7 Use of Servicer or Remittance Reports to Conduct Surveillance of the Credit Rating Required by Paragraph (a)(1)(ii)(G) of Rule 17g-7

- There is no use of any servicer or remittance report to conduct surveillance of the credit rating herewith presented.

8 The Types of Data Relied Upon for the Purpose of Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(H) of Rule 17g-7

- The information posted in the below, which includes data, is used for the determination of the credit rating herewith presented.

- A) Audited financial statements presented by the rating stakeholders
- B) Explanations of business performance, management plans, etc. presented by the rating stakeholders

9 Overall assessment of the Quality of Information Available and Considered in Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(I) of Rule 17g-7

- JCR holds its basic policies for securing the quality of information as a base of due diligence for the determination of credit ratings. The information used as a base for the determination of credit rating herewith presented satisfies such policies, which include the audit by an independent auditor, the publication by the issuer or some independent media or, otherwise, JCR analyst's scrutiny, etc.
- JCR sees no particular weakness in the quality of information used for the determination of the credit rating herewith presented as compared to the information used in other cases of the credit rating for comparable issuers or ratable objects.

10 Information Relating to Conflicts of Interest as Required by Paragraph (a)(1)(ii)(J) of Rule 17g-7

- JCR receives payment of compensation for the determination of the credit rating herewith presented from either one of those parties who are issuer, underwriter, depositor or sponsor.
- JCR did not receive in the last fiscal year in the past payment of compensation from the same party for any kind of JCR's service other than the determination of credit rating, such as one in the ancillary business.

11 Explanation or Measure of the Potential Volatility of the Credit Rating as Required by Paragraph (a)(1)(ii)(K) of Rule 17g-7

A) Legal Protection and Support Provided by the Government

The credit rating is subject to alteration if there is a change in the issuer's legal support by the government, personnel or capital relationship with the government, importance in the government's policy, credit enhancement and other forms of the government's supporting policy, framework and the strength thereof. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is large.

B) Business Bases

The credit rating is subject to alteration if there is improvement or deterioration of the issuer's business bases, since its revenue, etc. may improve or deteriorate by the change in its business management policies, clients' preferences, competitive situation, or a technological innovation. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the business bases is large.

C) Financial Grounds and Asset Quality

The credit rating is subject to alteration if the issuer increases/ decreases its debt/ capital or vice versa and thereby makes its individual debt payment liability less or more bearable and its loss absorption capacity into the future decreased or increased. Also, the changes in the quality of asset under the issuer's holding may affect the credit rating, since such changes could raise or lower the likelihood of future loss of the issuer's financial grounds. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the financial grounds and/ or asset quality is large.

D) Liquidity Positions

The credit rating is subject to alteration if there is a change in the issuer's financial management policy or in the relations with fund procurement sources and the change thereby makes its liquidity

positions improve or deteriorate. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is large.

E) Creditworthiness of the Government, etc. that Constitute the Framework of Credit Enhancement
The credit rating is subject to alteration if there is a change in the creditworthiness of the government, etc. that constitute the framework of credit enhancement. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change on such framework is exceptionally large.

F) Various Events

The credit rating is subject to alteration on occurrence of various events, such as change in the issuer's major shareholders, M&A and other organizational change, accident, violation of the law, litigation, legal/ regulatory change, natural disaster, etc., which are unforeseeable at the time when the credit rating is determined, causing a significant change on the issuer's business bases, financial grounds, etc. The resultant alteration of the credit rating could be by a notch but more often than not as much as a few notches.

12 Information on the Content of the Credit Rating, Including the Historical Performance of the Credit Rating and the Expected Probability of Default and the Expected Loss in the Event of Default as Required by Paragraph (a)(1)(ii)(L) of Rule 17g-7

- Historical records of the credit rating herewith presented are posted in the end of this paper.
- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- Facts of the probability of default are posted as Form NRSRO Exhibit 1 on the JCR website under the URL:

<https://www.jcr.co.jp/en/service/company/regu/nrsro/>

13 Information on the Sensitivity of the Credit Rating to Assumptions Made as Required by Paragraph (a)(1)(ii)(M) of Rule 17g-7

A) Legal Protection and Government Support

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's legal protection provided by the government, personnel and capital relationship with the government, importance in the government's policy, credit enhancement and other forms of the government's supporting policy, framework and the strength thereof. The resultant change of the credit rating is most likely by one notch, as JCR stipulates, but possibly as much as a few notches if the change in the government's supporting policy is significant.

B) Business Bases

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's business bases and powers of earning or cash flow generation, etc. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's business bases on some drastic change in the operational environments, etc.

C) Financial Grounds and Asset Quality

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's financial grounds and asset quality. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's financial grounds and/ or asset quality on some drastic change in its business bases.

D) Liquidity Risks

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's liquidity positions. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's liquidity positions on some drastic change in its financial management policy or relations with fund procurement sources, etc.

E) Creditworthiness of the Government, etc. that Constitute the Framework of Credit Enhancement

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the creditworthiness of the government, etc. that constitute the framework of credit enhancement. JCR assumes the resultant change of the credit rating is most likely by a notch. The change could be as much as a few notches should the creditworthiness of said government, etc. change so greatly.

14

Information on the Representations, Warranties, and Enforcement Mechanisms of an Asset-backed Security as Required by Paragraph (a)(1)(ii)(N) of rule 17g-7

- The credit rating herewith presented is not for an ABS product, and hence no relevant issue.

Attestation Required by Paragraph (a)(1)(iii) of Rule 17g-7

I, Atsushi Kato, have responsibility to this Rating Action and to the best of my knowledge:

- A) No part of the credit rating was influenced by any other business activities.
- B) The credit rating was based solely upon the merits of the obligor, security, or money market instrument being rated.
- C) The credit rating was an independent evaluation of the credit risk of the obligor, security, or money market instrument.

加藤 厚
