

Japan Credit Rating Agency, Ltd. (JCR) announces the following credit rating.

## Ecology Trust Bond 1st Series Fund Trust Bonds and Trust ABL

### <Assignment>

Bonds:	A-
ABL:	A-

### Rationale

Stable cash flows are expected to be generated from this project during the project period thanks to the following: (i) revenue is based on FIT system; (ii) rights, etc. required for the operations over a long period are ensured; (iii) portfolio is well diversified; and (iv) a highly creditworthy asset manager will play a role of overall control of the project. Risks from construction are largely reduced, because all power plants have already started their commercial operations. Although there are various factors for fluctuations in the income, JCR has confirmed that the project's debt service capacity can be maintained even in cases of a quite strong stress being placed on it in combination of several factors. There are also schemes including reserve and suspension of dividend payment in preparation for occurrence of an unexpected event. Taking the above into consideration, JCR assessed the ratings on the trust bonds and trust ABL at A-.
