Japan Credit Rating Agency, Ltd.

21-D-1104 December 21, 2021

Japan Credit Rating Agency, Ltd. (JCR) announces the following credit rating.

Development Bank of Japan Inc. (security code: -)

<Affirmation>

Long-term Issuer Rating: AAA
Outlook: Stable
Bonds: AAA

Shelf Registration: Preliminary AAA

Rationale

- (1) Development Bank of Japan Inc. ("DBJ") is the government's wholly owned special company, which in October 2008 succeeded to all rights and responsibilities of its predecessor, former Development Bank of Japan. DBJ supplies risk money under the GRIT Strategy that focuses on, among others, the realization of a green society and construction of a stronger regional, social and industrial infrastructure. DBJ's ratings are supported by possible government support that DBJ can receive as an agency under a special act, with which the government will continue to be involved for a certain period of time, in addition to DBJ's standalone factors such as its solid business foundation established based on the relationships with large corporations and local public bodies as well as its disciplined financial management.
- (2) DBJ is legally obliged to implement Crisis Response and Specific Investment Operations, albeit on a temporary basis, while the Japanese government's additional capital injection into DBJ and holding of DBJ shares are stipulated for such implementation. For Crisis Response Operations in the wake of the COVID crisis, the amount of loans extended up to September 2021 reached 2.4 trillion yen, supporting the financing of basic infrastructure industries like transport machinery, railway and aviation. For the operators of restaurants, hotels and other such establishments who have been drastically affected by the crisis in particular, DBJ provides support in greater depth in response to the request from the government, partly by utilizing capital funds. In Specific Investment Operations, it backs up the companies responding to social changes such as accelerating digitalization amid the crisis. Given DBJ's relations with the Japanese government under the laws and regulations and the political significance of its operations as described above, JCR expects DBJ to retain its strong public nature for a reasonable period of time.
- (3) Core net business income (consolidated net business income before transfer to general allowance for loan losses) is expanding with improved loan profits owing mainly to growth in loans for Crisis Response Operations and a drop in financing costs. For the first half of the fiscal year ending March 2022 (FY2021), an increase in dividend received from the investees also contributed to a 55% year-on-year income hike, bringing ROA based on this income back to the 0.4% level on an annualized basis. For loans for Crisis Response Operations, demand is leveling out, while repayments will be made over the medium term. However, efforts aimed at boosting highly profitable loans such as structured finance and mezzanine loans will likely help ensure the loan amount. In terms of investment, DBJ is expanding mezzanine financing and investments in real estate and infrastructure-related businesses to secure stable earnings. Given these factors, JCR assumes that core net business income will remain solid and also decent as a buffer against credit costs, etc.
- (4) As DBJ makes many transactions with large blue-chip corporations, its non-performing loans ratio under the Financial Reconstruction Act is low, being less than 1% even as of September 30, 2021. While allowance for loan losses was increased for some industries that were greatly affected by the crisis in FY2020, a large part of it was reversed in the first half of FY2021 as funds were recovered at a good pace. Moreover, only a few borrowers have been reclassified into lower categories, and substandard and doubtful claims are almost entirely covered by collateral and allowances. JCR finds not much concerns about the quality of loan assets. Yet, quite a large part of investments and loans are for the sectors that tend to be affected by changes in the environment, including credit extension to large projects and investments in equity securities and funds, making profits more volatile. Given also that DBJ intends to keep increasing investments and loans with a reasonable level of risk-taking, risk assets will likely expand. Even so, consolidated common equity Tier 1 risk-weighted capital ratio is high, standing at the 17% level as of September 30, 2021. Equity capital is building up with profit

accumulation and the government's investments, and JCR assumes that risks associated with investments and loans will be controlled appropriately against capital.

 - Please see the news release. If the credit rating is a private rating, please see the report for private rating.
- The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7
 - The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and business environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees.
 - The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.

A) Business Bases

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

B) Financial Grounds and Asset Quality

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

C) Liquidity Positions

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

- D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

 The likelihood of debt payment is affected one way or the other by the issuer's related parties such as parent company, subsidiary, guarantor, and the government of the issuer's business domicile, etc. by their own conditions and/ or position of support/ assistance for the issuer.
- E) Order of Seniority in Debt Payment

 The likelihood of debt payment can be different between given debts of the same issuer. The
 likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its
 rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment
 which is determined by design as financial product or by laws, etc.
- The Potential Limitations of the Credit Rating as Required by Paragraph (a)(1)(ii)(D) of Rule 17g-7
 - The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood.  - The objective of the credit rating herewith presented does not include any concerns other than the likelihood of debt payment, such as risks of price changes, market liquidity, etc.
 - The credit rating herewith presented is necessary to be reviewed along with possible changes of the issuer of rated objects in its business performance and/ or circumstances which include regulatory environment, and hence subject to possible alteration.

11 Explanation or Measure of the Potential Volatility of the Credit Rating as Required by Paragraph (a)(1)(ii)(K) of Rule 17g-7

A) Business Bases

The credit rating is subject to alteration if there is improvement or deterioration of the issuer's business bases, since its revenue, etc. may improve or deteriorate by the change in its business management policies, clients' preferences, competitive situation, or a technological innovation. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the business bases is large.

B) Financial Grounds and Asset Quality

The credit rating is subject to alteration if the issuer increases/ decreases its debt/ capital or vice versa and thereby makes its individual debt payment liability less or more bearable and its loss absorption capacity into the future decreased or increased. Also, the changes in the quality of asset under the issuer's holding may affect the credit rating, since such changes could raise or lower the likelihood of future loss of the issuer's financial grounds. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the financial grounds and/ or asset quality is large.

C) Liquidity Positions

The credit rating is subject to alteration if there is a change in the issuer's financial management policy or in the relations with fund procurement sources and the change thereby makes its liquidity positions improve or deteriorate. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is large.

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The credit rating is subject to alteration if there is a change in the issuer's parent company or subsidiary, guarantor or other provider of credit enhancement, or the government of the issuer's business domicile, or other related parties' own conditions and/ or position of support/ assistance for the issuer, and the change thereby makes its business bases, financial grounds and/ or liquidity positions improve or deteriorate, and/ or making the effectiveness of guarantee and other credit enhancement improve or deteriorate. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large.

E) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

The credit rating is subject to alteration if there is a change in the rated debt's status in the order of seniority relative to other debts caused by the improvement/ deterioration of the issuer's financial condition. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large. Also, in case of the financial products for which non-payment of interest/ principal is contractually permissible, the credit rating is subject to alteration if and when the likelihood of such non-payment is projected to increase or decrease. The resultant alteration of the credit rating could be by a notch but often as much as a few notches.

F) Rise and Fall in General Economy and Markets

The credit rating is subject to alteration if there is a rise/ fall in the general economy and/ or the markets inducing the issuer's revenues/ expenses to increase/ decrease and vice versa, etc. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is exceptionally large.

G) Various Events

The credit rating is subject to alteration on occurrence of various events, such as change in the issuer's major shareholders, M&A and other organizational change, accident, violation of the law, litigation, legal/ regulatory change, natural disaster, etc., which are unforeseeable at the time when the credit rating is determined, causing a significant change on the issuer's business bases, financial grounds, etc. The resultant alteration of the credit rating could be by a notch but more often than not as much as a few notches.

Information on the Sensitivity of the Credit Rating to Assumptions Made as Required by Paragraph (a)(1)(ii)(M) of Rule 17g-7

A) Business Bases

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's business bases and powers of earning or cash flow generation, etc. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's business bases on some drastic change in the operational environments, etc.

B) Financial Grounds and Asset Quality

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's financial grounds and asset

quality. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's financial grounds and/ or asset quality on some drastic change in its business bases.

C) Liquidity Risks

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's liquidity positions. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's liquidity positions on some drastic change in its financial management policy or relations with fund procurement sources, etc.

- D) Related Parties' Status and Stance of Support/ Assistance for the Issuer
 - The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's parent company or subsidiaries, guarantor or other providers of credit enhancement, the government of the issuer's business domicile or other related parties' status and stance of support/ assistance for the issuer. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if there is a major change on the part of related parties, such as replacement, disappearance, some drastic improvement/ deterioration of financial grounds/ balances, etc.
- E) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

 The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the order of seniority in repayment of interests and principal. JCR assumes the resultant change of the credit rating is most likely by a notch. The change could be as much as a few notches if the issuer's financial structure differs so much and thereby the balance between debts shifted so greatly. Rating change is also possible in case of the financial products for which non-payment of interest/ principal is contractually permissible, if and when the assumptions made at the time of its determination turns out to be inaccurate. The change of the credit rating is assumed to be by a notch but often as much as a few notches.
- Information on the Representations, Warranties, and Enforcement Mechanisms of an Asset-backed Security as Required by Paragraph (a)(1)(ii)(N) of rule 17g-7
 - The credit rating herewith presented is not for an ABS product, and hence no relevant issue.
